## Timms Dredge To Be Moved to Whitney

It is expected that there will be a dredge operating on Upper Burnt river above Whitney before the end of the year. The Timms Gold Dredging company operating on the Middle Fork of the John Day river near Galena has acquired a large acreage of land in the vicinity of Whitney and when the ground the boat is now on is worked out the boat will be dismantled and moved to the new location. The boat should work out the ground at the present location by September, C. H. Timms, manager, says.

The Whitney land has been tested and the new location decided upon, however, additional land in that vicinity will probably be prospected during the summer.
