COLE CLAIMS

WALLOWA R.
HOMESTEAD
(S.R.) DIST.

The Cole Claims.—These claims are located in a branch gulch less than a half mile west of the river from Ballard's landing. The country rock is an altered volcanic breccia containing some chalcopyrite. The deposition of this mineral was probably influenced by a shear zone. The chalcopyrite is in fair sized grains and in minute reticulate veins. Much secondary quartz and chlorite are present. A vein about one foot wide is being followed with the expectation, after some further work, of reaching one of much greater width which is said to outcrop upon the hill. This larger outcrop was not visited.
