EQUIPMENT ON PROPERTY

GALLAGHER MINE

Lower Burnt River District
Baker County

Owner: James Berri, Durkey, Oregon.

Location: Upper Manning Creek. N. half of sec. 2, T. 11 S.,
R. 44 E.

Geology: The main vein strikes from north 50 to north 75 east and dips from 30° to 60° to the north. It is developed by at least two tunnels and probably a third although this one is caved. The ore has been stoped from the upper tunnel almost to the surface along an ore shoot which apparently strikes approximately east-west. This ore shoot nearly parallels the surface of the ground and may represent secondary enrichment in the zone of oxidation rather than a true ore shoot. The drag along the vein, however, parallels the rake of the shoot. In the lower tunnels very little values are found, so it is probable that most of the high-grade ore which has been shipped in the past is secondary enrichment.

Date: 6-6-39.
