

Testing Mormon Basin Gold Gravel

E. H. Seaver, representing the Pacific Placer Engineering company of Glendale, Calif., is in charge of drilling work in Mormon Basin, at present on the Boswell claims, the company is testing for gold values and is said to contemplate a \$130,000 plant if values prove out.

In gravel said to be sufficient for about three years mining, first tests were said to be favorable. In addition some ground might be available on Willow creek, also in Malheur county.
