## GOLD COIN PLACER

LOOKOUT -  
PEDRO MT R.  
MORMON  
BASIN DISTRICT  
and  
Weatherby

*The Gold Coin Placer.*—This property is located about two miles southwest of the Gold Ridge, about one-half mile north of the Rye valley wagon road and eight miles from Durkee. It is almost at the summit of the ridge that lies between the Rye valley road and the Gold Ridge mine. It occupies the southern side of the hill and reaches an elevation of about 500 feet above the road.

The gold is found in gravel beds belonging to the Tertiary Lake Bed formation. The beds are tilted and somewhat faulted. They consist of pebbles of quartz, flint, greenstone, granite, rhyolite, and volcanic tuff. The pebbles are rounded and vary in size from 3 to 4 inches down to sand. The finer material is usually granular, although some clay is present in places interbedded with the gravels.

There are many other placers in this vicinity, but for the most part they have been worked in a small way.
