

## Boyce Acquires An Interest in Chloride

W. A. Boyce of Baker has taken over an interest in the operation of the Chloride mine in the Rock Creek district, with Frank Holt. Mr. Holt has been working at the Chloride the past year, and last year brought to Baker samples of a strike of ore that showed considerable promise.

Mr. Holt returned to the mine this week after recovering from a severe illness.

The Chloride property is near the Banner Consolidated group of claims owned by Mr. Boyce.

Highly mineralized showings have been made in the old Chloride mine at the head of Rock Creek near Baker, Oregon. Frank A. Holt, Baker, and associates are cleaning out and reopening the old workings of the mine. The ore carries silver and lead as well as gold. Workings include a 300-foot crosscut to the vein and a 100-foot drift on the vein.
