Industrial Minerals Division, A.I.M.E.
1952 Annual Meeting, New York, February 18-21

Dear Mr. White:

Program arrangements have all been completed for the New York meeting. This notice is sent to you in advance of the distribution of the official program as a confirmation of your part of the program of the Industrial Minerals Division.

Your paper, "Occurrence of Scheelite in Oregon," is scheduled for the Technical Session of Wednesday, February 20, which starts at 2:00 P.M. in Parlor 1 on the Ball Room floor of the Statler Hotel. Dr. Ian Campbell and Mr. John G. Broughton are the co-chairmen for this meeting and will endeavor to do everything necessary for your convenience in the presentation of your paper. If you have any special requirements, please write in advance to Dr. Sandford S. Cole, Titanium Division, National Lead Company, Post Office Box 58, South Amboy, New Jersey, stating what is needed.

It has been customary at past meetings for authors and chairmen to become acquainted and discuss any last minute details at special meetings which are held at the headquarters hotel on the morning of the Technical Session in question. These meetings are held just prior to the 9:00 A.M. starting time for most of these sessions. The official A.I.M.E. program will give the exact time and room for these meetings. If convenient, you may wish to take advantage of this informal pre-session meeting.

We appreciate greatly your interest in presenting a paper at our 1952 Annual Meeting and trust that you will find the overall program of interest and benefit.

Cordially yours,

A. B. CUMMINS, Chairman
Industrial Minerals Division

Portland 1, Oregon

Dear Mr. White:

In reply to your letter of December 18th we are allowing thirty minutes for presentation and discussion of any paper, and in one or two sessions longer time has been allowed. If you plan for 20-25 minutes for presentation it will work out very well.

A complete manuscript is not required before the meeting, although it is desirable but not necessary to have it ready for the meeting so that copies (3) can be turned over to the secretary's office. No restriction on number of slides etc., is made for purpose of presentation.

It is preferable to have slides (3-1/4x4") made of 8-1/2x11 inch material since it projects better. A reflecting projector can be provided if you do not have regular slides. I would like to have advance notice of your need for a reflecting projector since it will be necessary to make request for this equipment from the secretary's office.

Very truly yours,

Sandford S. Cole
