702 Woodlark Building  
Portland, Oregon  
COOS BAY AREA

## HONE MANGANESE

Reported manganese on this property proved to be basalt and stained sandstones.

Owner: Axel Hone, Box 1144 Burker Hill, Marshfield, Oregon.

Location: sec. 30, T. 29 S., R. 11 W.

Area: deeded land.

Geology: According to the geologic map of the Coos Bay quadrangle, the country rock is Eocene ~~PA~~ Pulaski sandstone with intrusions of Eocene basalt. The main locality was in the bed of a small stream where a basalt intrusion has formed falls in the stream. No evidence of manganese was found. The other locality consisted of stained Pulaski sandstone - principally iron stain.

Informant: Axel Hone and Ray C. Treasher, May 19, 1941.  
Report by: ROT, May 20, 1941.
