JUPITOR GROUP (Au)

2008

~~Curry County~~
~~Sixes River Dist.~~
Powers

Owners: Harry B. Hughes, Bandon, Oregon, and W. W. Coy, Powers, Oregon.

Location: This property is located 17 miles southwest of Powers on Sucker Creek in Sec. 3 or 10?, T. 32 S., R. 13. W. 12W

Area: Jupiter one to five inclusive all full size lode mining claims held by location.

Miscellaneous Information: The ore is said to be white quartz which contains pyrite, galena, chalcopryite, and free gold. The ore bodies are lenticular, maximum width 1 ft. The country rock is greenstone, probably gabbro. A number of years ago two tons of this ore was shipped to Selby and gave good returns but was not commercial at that time because of the narrowness of the vein and the long distance which the ore had to be packed to the railroad. There are two tunnels, one 80 ft., and the other 45 ft. The above information was supplied by Mr. W. W. Coy, one of the owners.

Informant: J. E. Morrison.
