Portland 5, Oregon

SCHULTZ CLAIMS (U)

Crook County

Location: Near ^{CAREY} Clary Ranch, up Crooked River in NE $\frac{1}{4}$ sec. 27, T. 16 S.,
R. 17 E.

Development: Several discovery pits.

Owners: Bernie J. Schultz (MINING CLAIM)

Geology: Layered sequence of volcanics and volcanic sediments of
Clarne formation. Section from top to bottom of cliff or slope on which
prospecting has been done: Rhy. tuff — hard resistant rimrock — 30'

Bedded siltst. or mudst. with tuff — about
250'

Varicolored tuff. sed. — principally
siltst. & mudst. with some shales.
Bedding N. 30 E., 50 NW.

Rhyolite tuff — 25'

Varicolored tuff — 60'

Rocks are probably of Clarne age. Tuffs look like John Day, however.
Clarne because of flows included in series (?) of rhyolite.

Examination: Discovery pit on #3 was examined closely. Rocks in
general area were tested. No radioactivity was found. No samples were
taken.

Visited by: Max Schafer and H. G. Schlicker May 25, 1956.
