702 Woodlark Building
Portland, Oregon

Oroungo

Crook Co.

CONFIDENTIAL

Any cinnabar ore on this property would have to be high-grade in order to be economic. The mineralized areas are too narrow and discontinuous for any operation except on the smallest scale, and even this type might be doubtful. No high grade was seen.

Well, if they CAN get tin out of basalt and obsidian, this is as good a country as any to lay out claims in! I'd watch this set up though.....I'd be afraid that the "working company" MIGHT yield to the temptation to accept working capital if they were sufficiently pressed.

John Elliot Allen
