

July 18, 1942 *FW*

State Department of Geology and Mineral Industries

702 Woodlark Building
Portland, Oregon
Agness Area

EDNA FRY CHROME

Owner: Edna Fry, Illahee, Oregon.

Location: Center of sec. 14, T. 34 S., R. 12 W., about a mile from Illahee and just west of Two-Mile Way ~~area~~. One claim located dated February, 1942.

Development: One cut about 20 feet long and 5 feet high. A small pod of chrome is exposed.

Geology: The ultra basic rock of this particular area has been altered to serpentine and near the surface they are somewhat decomposed and softened. The chrome seems to be very similar to that of the North Star claim; it is granular and tends to decompose to sand. About $\frac{1}{2}$ ton is in place and about 2 tons have been piled out on the dump. There has been insufficient prospecting to indicate the size of probable ore body.

Informant: RGT, 7/14/42.
