October 1, 1953

Mr. David White
State Assay Laboratory
Grants Pass, Oregon

Dear Dave:

Herewith is a report on a so-called limerock deposit at Glenbrook Ranch which is on property under lease to Hanna.

Kischel gave me a copy of this report in Seattle and there appeared to be a question in his mind as to whether or not it occurs on one of the 40-acre tracts which we examined in connection with the Hanna lease from Douglas County. I think it is outside the boundaries of that tract but Foster will check definitely. In any event, it seems quite unlikely that the deposit has any commercial value. It is described in our Douglas County bulletin as the Hammersley limestone deposit.

Sincerely,

Director
