M.W.

I. X. L. is a well known mine of the Greenhorn district which will be reopened during the summer according to plans of G. W. DeBeaur of Boise. Mr. DeBeaur and associates have contracted with the owner, Fred T. Kelly of Boise, Idaho, for the property. The I. X. L. mine was operated some 35 years ago when it was developed by a shaft 300 feet deep and equipped with a mill. It is understood the water will be pumped from the shaft and the mine workings reconditioned when plans for operating will be determined.
