EQUIPMENT ON PROPERTY

"These claims are located in the southeast corner sec.6, T.10 S., R.35E. and about $\frac{1}{2}$ mile north from the Bi-metallic claim, elsewhere described, and practically on its extension with the same strike of vein. It is in diorite and greenstone. The ore consists of quartz with tetrahedrite rich in silver, and the pay streak is reported to be as much as three feet wide. This property has shipped ore from time to time. The work is usually performed by leasers. Owing to a combination of circumstances the property was not visited."

This property was relocated in 1937 by C. W. and W. C. Gardner of Baker, Oregon, who shipped 78 tons of ore to the Tacoma Smelter in September 1938. One car of ore was shipped during 1940.

Informant: J.E.A. '39; H.K.L. (2/26/41).
