

TEMPEST MINE (Gold and silver)

Greenhorn District

Greenhorn Area

Owner: Otto Simons, 1336 Third Street, Baker, Oregon

Location: Located at the head of Granite Boulder Creek three miles northwest of the Morning Mine in sec.2, T.10 S., R.34 E. Adjacent to Chloride and Carbonate Mines.

Area: Four unpatented claims known as the Tempest 1, 2, 3, and 4.

History: Prior to 1916 the property was owned by the Bennet estate,

crosses in a distance of a little over 1000 feet a dozen or more veins or lodes consisting largely of quartz, and varying in width from about a foot to 20 feet or more. These veins strike N.40° E. and dip 50° E. to 75° E. They are fairly strong fissures, some having been traced for several hundred feet along the strike. These veins are made up of solid quartz, replaced rock, gouge, and in one of the veins considerable pyrite was noted. Gold is free, at least near the surface. Most of the work has been done on the upper and smaller veins, where the ore in places is said to be rich enough to pay to treat in their 2-stamp mill, to which the ore is hauled from the tunnel portals. It is claimed that on the lowest vein a sample across more than 20 feet assayed \$16.20. Two hundred fifty-six feet of tunnel was run in 1915".

Informant: Larry Crew; J.E.A. (mine not visited) 10/8/39.

This property was idle during 1940. H.K.L. 1/26/41.
