OPHIR MINE (Gold)

Quartzburg District

Quartzburg Area

Owner: William Clark, Standard Oil Station, Prairie City, Oregon.

Location: S₃¹ sec.10, T.12 S., R.33 E., approximately 1 mile west of Dixie Creek.

Area: 11 unpatented lode claims.

Geology: All tunnels are in granite of varying grades from almost a diorite to a very light color. All "veins" are shear zones with a white gouge. Wide areas in the granite are criss-crossed by numerous limonite stringers. The tunnel visited runs more or less north and south. The vein systems followed, dipped uniformly to the east from 50° to 70°. Other intersecting systems dip northerly.

Development: . There are 2 levels with openings as follows: 600 feet of drifting, 60 feet of crosscut in one direction and 70 feet in the other on the number 1 level, and 700 feet of drifting and 40 to 50 feet of crosscut on the number 2 level. These tunnels were caved when the property was visited. The third tunnel is about 400 feet long with a general southerly trend.

Informant: J.E.A. (10/17/38).
