Robert Taylor  
135 Fern Valley Road, No. 25  
Medford, Oregon 97501

Dear Mr. Taylor:

Your request for information on the Skyline Mine, Jackson County, Oregon, has been referred to this office.

Attached is a computer listing for the Skyline Mine from the U.S. Bureau of Mines' Minerals Industry Location System (MILS).

A search of our records and library for information on the mine did not yield much factual data. Our records indicate, however, that a small amount of gold and silver was recovered in 1922, 1923, and again in 1940.

The property is briefly described in Oregon Department of Geology and Minerals Industries Bulletin 61 (copy attached). Additional information on the mine may be available from Len Ramp of the Oregon Department of Geology and Minerals Industries in Grants Pass. Mr. Ramp's telephone number is 503-476-2496; inasmuch as he may be in the field, it is advisable to call for an appointment.

Sincerely,

Robert D. Meldin, Chief  
Branch of Minerals Availability
