Mr. Elton A. Youngberg
State Assay Laboratory
Grants Pass, Oregon

Dear Elton:

That was a heck of an assay that you took at the Miller property.

It doesn't look very good to me as the composit of the 17 samples was only \$231.70--a total of 6.32 oz. in gold.

I have quite a bit of correspondence from New York and there is a wonderful deal in the making. I saw Fred Whaley today and showed him the correspondence. It is really interesting. This may be closed in the next couple of weeks.

Yours truly,

E. R. K. Waite
