Argonaut Gold Mining Co.

Oregon Corporation, Mrs. B. C. Dean Rogee River Oregon
V.P. and manager; Capitalization \$300,000, Common \$200,000
preferred.

Area 674.55 acres patented land under jointure contract
in Secs. 1 and 2, T 35 S R 4 W, in Secs. ³⁵ 36, T 34 S, R 4 W.

Located on Bykes Creek a branch of Evans Creek about 11 miles
from Rogee River. Principal workings are ^{about} 1900 ft elevation and
highest elevation 2800 ft. Water and timber on property.
Geology: Eastern side of property are slates and schists with small
areas of greenstones; western part is quartzite. The slates
and schists dip steeply eastward.

The veins and lodes are in the slate and schist and
roughly parallel the contact with the quartzite.

The lodes are made up of slate and schist with narrow
lenses and veinlets of quartz across considerable widths.

Iron sulphides are found in rock and quartz and
is gold bearing. Much work has been done by drifting
^{shallow shafts} and surface work with a limited amount of crosscuts.

The company hopes to develop a sufficient tonnage of
medium grade of ore to justify the erection of a mill
at selected ore to be followed ^{later} by a low
provided a sufficient tonnage of low-grade can be
