

February 17th, 1940.

Mr. J. D. Bowdish,
1260 Sunset,
Medford, Oregon,

Dear Mr. Bowdish:

While securing information for our Mines Catalog about the placer operations of the Southern Oregon Mining Company, I asked about the location of the area now being held and mined by your Company. As you were not certain of the exact description, I asked if you would let us have these data.

I am enclosing a postal card on which questions about location, names of officers, etc., are given. If you can answer these, we will be very happy to include it in our catalog, and thus make the record more accurate.

The attitude of dredge operators, in general, has been most gratifying in that information has been given so freely. I believe that we will be enabled to picture the dredging activities with considerable accuracy as a result of this attitude.

Yours very truly,

Ray C. Treasher,
Field Geologist.
