Mr. John W. Morris
La Grange, Illinois

Dear Mr. Morris:

This Department is preparing a Mines Catalogue for Jackson and Josephine counties and we are assembling all information I visited the Millionaire Mine, but of course was unable to get underground or secure any information about it. We would like to have access to any engineering reports and mine maps that you may have. When our report is prepared we can submit it to you for approval before publication if you wish. Any information that you can give us will be greatly appreciated.

Yours very truly,

Ray C. Treasher,
Field Geologist

Mr. Ray C. Treacher
Field Geologist
402 E. 1st Street
Grants Pass, Oregon

Dear Sir:

I just received a letter from Mrs. Northrup of Central Point, Oregon who has the farm next to my mining property known as the Millionaire Mine. She said that you had been out to the property and wished to see me. I had the bad luck to become sick while at the mine and had to return to my home here in Illinois.

I purchased the Millionaire mine and property of 726 acres and had hoped to have been able to get the mine into operation as I really

have reason to believe that the old Millionaire
mine is really worth working and that its
failure was do to poor engineering and
stock promotion.

I am sorry that I was not
out there at the time you visited the
property as I had been told that I have
uranium in the ore which is on the
Millionaire mine dumps.

If there is anything you
wish to know about the mine or property
please let me know and I will be
The glad to let you know.

Yours Truly
John W. Morris
