Fritz Saust
806 Southeast Pine Street
Roseburg, Oregon 97470

Dear Fritz:

I have included the results of the assays on the Murphy Gulch property samples you brought me when you were here a couple of weeks ago. I had the Silver Valley Lab fire assay, and run cyanide leach tests for gold and silver on all the samples. In addition, I had sample 12027 tested for arsenic, antimony and mercury.

The results speak for themselves, there is nothing in the samples I had assayed that would interest Sunshine Mining Company.

Wayne has not sent his report to me on the testing we did on the Pistol River Property. When he does, I will send it on to you with the other assay data I have on the property.

Have a good holiday season, Merry Christmas and Happy New Year.

Sincerely yours,

SUNSHINE MINING COMPANY

George W. Sintay
Senior Exploration Geologist
