STATE DEPT OF GEOLOGY
& MINERAL INDS.

Jackson
Josephine County
Grubstake, 1937

Name: North Star Group (gold quartz)

Owner: Davis James Hancock, 501 D Street, Grants Pass, Oregon.

Location: On Little Birdseye Creek in Sec. 9, T. 37 S., R. 4 W.
5 miles south of Rogue River, Oregon. Two full claims,
40 acres, recorded in Book 36, Pages 264 and 265.

History: This property has been located before but unable to
find out any information on past history. A discovery
cut about 4 feet by 4 feet on each of the four claims.

Geology: Along Birdseye Creek the formation is covered by
alluvial material. The ridge north of the Creek is
gabbro which appears to be mineralized. Considerable
fracturing was noted. There were no general strikes or
dips noticeable. No veins were exposed. In cut No. 4
a shear zone about 6 inches wide was filled with lime
soda feldspar and quartz. Steep mountain topography.
Elevation 2500 feet. Plenty timber for mining. Little
Birdseye Creek is said to run all year. If so, it
should furnish sufficient water for a small mill. Three
feet maximum snow, work all year. Copco power lines
three miles from property.

The following assays were taken:

				Silver	Gold
Cut No.	1	Claim 1	4 ft. wide	Blank	Trace
" "	2	" 2	5 ft. "	"	"
" "	3	" 3	4 " "	"	"
" "	4	" 4	4 " "	Trace	0.70
" "	5	" 4	shear zone 6 inches wide	Blank	Trace

Claims were not recorded at the time of my visit and
Mr. Hancock intended to locate 4 claims. Later I noticed
that the location notices which were filed were on claims
2 and 5 and according to the description were tied to the
other claims. 5 was an extension of 4. All the claims
were running in the westerly direction along Little Birds-
eye Creek.

Informant: J. E. Morrison, 4/4/38.
