Mrs. Joyce Bork
1011 Jolisa
Medford, Or. 97501

Dear Mrs. Bork:

On July 8th we loaned you a copy of "Table Rock" by Katherine Leavitt. If you are through studying it, would you please return the copy for our files. Also wondered if you were able to contact the lady and gather additional information from her. This is just a reminder about the article so that you will remember to return it when finished.

Sincerely,

Ruth E. Pavlat, Secretary

Thank you for allowing
me to borrow MS. Hartt's
papers. We have had a
copy made for the SOSE
Herbarium files. I have
been unable to make contact
with her but perhaps she
will be available this fall

Sincerely

Joyce Bark

Central Point, Oregon

Dear Miss Leavitt:

Thank you so much for sending the xerox portion of your manuscript on the history and geology of Table Rock.

I am real pleased that you have carried this through to completion and I know a great many people will derive pleasure from your work.

Our Department is becoming more cognizant of the "recreation geology" all the time. I really believe that the work folks such as you do adds another full dimension to the general appreciation of the land around us and golly it is wonderful!

Thank you very much also for your best wishes on the recent press releases. Although these releases were premature, I have every reason to believe they will come to fruition.

Sincerely yours,

Hollis M. Dole
State Geologist

STATE DEPT. OF GEOLOGY
& MINERAL INDS.

Dear Mr. Dole:

Nearly two years ago I wrote you in regard to information about the geology of the Table Rocks. You very kindly sent me a copy of the Medford geologic map and referred me to Mr. Norman Peterson with whom I might discuss the geology of the region. This I did and I finally got my book finished and assembled three copies as reference books for the Medford Public Library, Central Point Branch Library and the Jacksonville Museum.

Since the book is too localized to be of value to people living elsewhere it wouldn't pay to publish it so I can't send you a copy. However, the Jackson County Federal Savings and Loan Company of Medford donated the copies for the libraries as a contribution to a community project. They also ran off

some extra copies of the geology, flora and fauna etc. for interested people and I am happy to send you one of the copies of this. Am also enclosing a newspaper clipping that you might find interesting since you have a nostalgic feeling for Table Rock along with many of us.

I thank you so much for referring me to Mr. Peterson he was most gracious and very helpful to me.

Sincerely yours,

Katherine Leavitt.

P.S. The evening paper just arrived announcing the good news of your probable appointment as ass't to the Sec. of the Interior. I am delighted and do hope that you will see fit to accept the appointment.

With this pending I am sure you haven't time to be interested in Table Rock history but since the letter was already written I'll send it along anyway.

Congratulations and best wishes.

K. L.

Hi Norm,

Don't know why Hollis wanted me to read this, but I did and am sending it to you as per instructions. It's wierd and wonderful what the amateur writes on geology. Mrs. Leavitt got some of it right, but that was probably your doing.

Maggie
