Granite Hill Mine

Grants Pass Courier, January 27, 1937

## TACOMA MEN BUY "GRANITE HILL"

Tacoma interests have purchased the Sunbeam mine, 16 miles south of Grants Pass in the Williamsburg district, and the Granite Hill mine, nine miles north of Grants Pass in the Granite Hill district, with William F. Hayden as consulting engineer in a proposed development program. Both properties are under the management of E. C. Annes, formerly of British Columbia.

The Sunbeam mine, located on the Applegate river, has undergone considerable development and the new owners expect to spend not less than \$60,000 to \$70,000 in further development. It will be placed in operation within the year, according to Mr. Hayden.

The Granite Hill mine comprises both quartz and dredging deposits. It will be extensively developed during the next year. The owners expect to expend at least \$100,000 to \$150,000 in equipping the dredging areas, which will include the installation of a large drag line dredge and also in de-watering the Granite Hill main shaft, rehabilitating the underground workings and placing the quartz deposits in operation.

During the past few months the company's engineers made a complete survey of the property, as well as extensive examinations, preliminary to the actual development program to be carried out.
