State Dep't. of Geology & Mineral Industries

329 South Oak Street

Portland, Oregon

Gentlemen:

Through the advise of Mr. Harry Woodward of San Diego, California, I am sending you an engineers report on the Grouse Mountain Mine. I would suggest that you have your engineer call on me the first time he is in our district as I can show him the underground maps and maps of the mine and arrange prices with him.

Yours very truly,

George W. Kearns

Grants Pass, Oregon

Dear Mr. Kearns:

This is just to recall my brief visit with you the other morning.

I am having the data you kindly loaned me copied and shall return it to you in a few days.

I am asking our field geologist, Mr. Treasher, who is moving to Grants Pass shortly to make a geologic investigation of your property at his convenience so that we can form an opinion of what to suggest. Meantime, I am digging up the assay results of the work done by Mr. Morrison.

With best wishes, I am

Sincerely yours,

EKN:vm
