Mr. O. W. Sorensen  
Uranium Corporation of America  
Failing Building  
Portland 4, Oregon

Dear Mr. Sorensen:

Responding to your letter of December 1, Mr. R. N. Roby, 3436 Taft Drive, Spokane, Washington, is a mining engineer of considerable experience and might fit the position you have in mind on a resident basis.

My previous supervisor while with the Cyprus organization, is now "free lance" and might be interested in a non-resident fee or retainer position. His address is: Blair W. Stewart, 1934 N. Oxford Avenue, Hollywood 27, California.

A friend, Jack Byrd, has been occupied as a contract miner for a long period of time. My last address for him was York, Montana.

Another friend, George Blackbird, Pinehurst, Idaho, is a first-class contract miner.

Very truly yours,

S. K. Garrett

Dear Mr. Garrett:

We are interested in making contact with a top flight executive type managing engineer and also would appreciate the names and addresses of some good contract miners if you know any you can recommend.

Would appreciate any cooperation that you might give us in keeping this matter confidential.

Very truly yours,

URANIUM CORPORATION OF AMERICA

Mr. Bob Anderson  
Sunshine Mining Company  
Peyton Building  
Spokane, Washington

Dear Bob:

Enclosed please find a copy of the data in our files on the lime-stone property that we discussed. There are a number of owners in this compound of properties and it would require considerable negotiation. Our negotiations thus far lead us to believe that we could deliver the compound of properties for a total price of somewhere in the neighborhood of \$350,000.00. Several Geologists that I am personally acquainted with have expressed the opinion that this is the best looking open pit lime property on the West Coast. However, not knowing too much about the non-metallics, I would not have a qualified opinion. We have a local Geologist who is entirely familiar with this property and who is one of the principle owners, he would be glad to furnish any additional information you might require. If this is of interest to you let me know and we will work from there.

Regarding the Barite, a friend of mine tells me there are two massive deposits in Montana that offer large potential. So far I have not obtained all the data or reports, however, if you wish me to do so I will be glad to dig into the matter further.

Regarding the Dailey property at Wickes, I hope it will be convenient for you to check that property out yet this month as we are interested in working out a joint venture with an operator to further explore both the high grade and low grade and economic possibilities of ore at the Dailey. Our DMEA program of half a million dollars, to be spent on the mine in exploration is designed to further explore and prove

Page II  
Bob Anderson

or disprove sufficient ore bodies of economic interest. Expansion of our program at the property necessarily depends on the final approval of this loan. However, we would much prefer a joint venture with Sunshine as we know you have the operating personell and know-how. If the low grade does not hold up or prove feasible, it might be possible to develop some wide sections and ore shoots at the intersection on the high grade veins. It is apparent there are quite a number of targets to shoot at in this property, however, it was never our intention to get into the operation business as I explained to you previously. We are in fact, <sup>ing</sup> just prospectors and would like to continue our program of exploration on some 37 other properties that we hold title to.

If we can be of service to you in any way, please let us know.

Very truly yours,

URANIUM CORPORATION OF AMERICA

Mr. Ralph D. Hoopes  
S Manager, Partner Company  
Foodstuffs Building  
Portland, Oregon

Re: Limestone properties

Dear Mr. Hoopes:

The properties involved are as follows:

1. The west half of the west half of Section 30 in Township 37 South, Range 6 West of the Willamette meridian.
2. The east half of Section 25 in Township 37 South, Range 7 West of the Willamette meridian.
3. The southwest quarter of Section 25, Township 37 South, Range 7 West of the Willamette meridian.

All in Josephine County, State of Oregon.

All of the above described properties are owned by A. A. Hook & Associates (nearly all members of Mr. Hook's family). All of said property consists of unpatented mining claims and are grouped in the records of Josephine County as follows:

1. The Terry group consisting of 7 claims.
2. The Portland Rock group consisting of 8 claims.
3. The Carly Am group consisting of 8 claims.
4. The Virginia group consisting of 8 claims.

Mr. Hook and the writer of this letter control all of said claims except 2 in the Virginia group. He and I both believe that these claims can be included although we have no jurisdiction authoritatively to do so.

Grant's Pass Limestone Products, Inc. has a 99-year lease (about 50 years yet to run) covering the Terry group (the west half of the west half of Section 30). All of the stock of that company is owned by Mr. and Mrs. Hook and Mr. and Mrs. Conley. A large quarry has been opened up by the company on the Terry group. The company has built a road a little over three miles in length from the quarry down to the public road. The right-of-way for this road is owned by the company except that portion covering government land and, as to this, has a perpetual lease. It also has a government lease on a plant site of 16 acres on the public highway at the terminus of the above-mentioned road. Approximately \$200,000. has been spent on the opening up of the quarry, diamond drilling in the vicinity of the quarry, building the road, the grading of the plant site and other necessary development work and equipment.

The property is now ready to operate. There is a very large demand for burned lime in the Willamette Valley, Portland and adjacent trade territory. All burned lime at the present time is being shipped into this territory from Missouri, East Texas, Louisiana and Mississippi. The freight rate from these points is from \$11. to \$16. per

the market that the property could be sold for \$350,000.00. The price of the property could be as low as \$250,000.00 or as high as \$450,000.00.

When the property comes into contact with a buyer, the price of the property will be determined by the buyer's interest in the property and the market conditions at that time.

You are hereby authorized to offer this property to any customer or customers with whom you are in contact. He would not want the property offered generally. We will protect you in a regular commission. Under this authority you may show the property to your customer and make such examination as you wish. When you are in a position to disclose to us the name of the purchaser, we will give you a definite exclusive authority for a reasonable period in which to work out a deal. Our price on the property is \$350,000.

We wish you luck.

Very truly yours,

GRANT'S PASS LIVE PRODUCTS, INC.
