

July 26, 1939

Mr. A. J. Bennett  
Box 547  
Wolf Creek, Oregon

Dear Mr. Bennett:

Inclosed you will find Assay Report covering samples taken from your property. Also, find attached hereto the gold from the cyanide test which is worth approximately 4¢. At this rate the ore that you run the cyanide test on runs approximately \$8.00 per ton, which is much higher than the sample taken from the ore on the dump. The assays showed it to be \$3.15.

Thanking you for the courtesies shown me on my recent trip to your property, I am

Yours very truly,

J. E. Morrison,  
Mining Geologist.

*Assay sent with this letter.*

October 14, 1939

Mr. D. L. Skelly  
825 So. Highland Ave.  
Los Angeles, California

Dear Mr. Skelly:

In reply to your letter of September 27th, I visited the Macabee Mine last July 14th and took 13 samples as shown on the inclosed copy.

I did not have time to make a complete examination as I would have liked to, but am convinced that he is in need of some one to really work out the geology of his property.

If I can be of any further service to you, please do not hesitate to call upon me.

Yours truly, .

STATE ASSAY LABORATORY

J. E. Morrison  
Mining Geologist
