Grants Pass. Oregon.

Att. Mr. Len Ramp.

Dear Sir:

In reply to your letter of Oct. 23, 1958. During the Gov't. Chrome program, I acquired the Sordy Chrome Mine and personally mined and milled approx. 4000 long tons of relatively low grade ore, produced by strip mining and approx. 4 to 1 ratio of concentration. I sold my total output comprising 940 long tons of concentrate approx. 52 %  $\text{Cr}_2\text{O}_3$  and 15 % Fe with Cr to Fe ratio 2.64 to 1 at the Gov't Depot at Grants Pass.

M.B.  
I sold approx. 820 long Tons in place at the mine to two separate parties for which I have no record of their grade and output of concentrates. Also contracted with another party to mine and concentrate approx. 1300 long Tons of ore, for the sale and output of which I was furnished incomplete and questionable records.

Trusting that the above will serve your purpose, I am,

Yours very truly,

*Dana W. Bowers*
