

# Sixty Years Ago

**From the Daily Courier  
Week Ending March 9, 1917**

An ore discovery that is of double value in that it not only establishes the existence of a large body of mineral in the Waldo mine, but which also determines the permanence of the copper leads in that region, has just been reported by the Waldo owners. It is said that from geological standpoint, the recent strike is the most important ever made in the Takilma district.
