Mr. Harold Barton
Route 4, Box 319
Eugene, Oregon

Dear Harold:

I've gotten the thin section back and have looked at it. I would call the rock a granodiorite and possibly add the word porphyry. The rock is considerably altered or bleached, probably hydrothermally. The presence of some hematite in fractures and the complete alteration of the amphiboles to chlorite and the abundance of sericite also points to hydrothermal alteration.

An estimation of the mineral percentages is as follows:

Potassium feldspar	20%
Sodic plagioclase	55
Quartz	15
Altered hornblende	6 (chlorite)
Opaque, calcite and other secondary minerals	4
	<u>100%</u>

Sincerely,

H. G. Schlicker
Geologist

Canada

Dear Mr. Kirsch:

Thank you for your letter inquiring about mining claims in the Bohemia district of Oregon. We can provide Xerox copies of reports published in our Mines Handbook, Bull. 14-D, covering the Noonday, Bohemia, and Champion (Excelsior) properties at a cost of \$1.50. Your attention is also invited to the following standard references:

Taber, John W., 1949, A reconnaissance of lode mines and prospects in the Bohemia mining district, Lane and Douglas Counties, Oregon: U.S. Bur. Mines Inf. Circ. 7512.

Callaghan, Eugene, and Buddington, A.F., 1938, Metalliferous mineral deposits of the Cascade Range in Oregon: U.S. Geol. Survey Bull. 893.

Diller, Joseph S., 1900, The Bohemia mining region of western Oregon with notes on the Blue River mining region and on the structure and age of the Cascade Range: U.S. Geol. Survey 20th Ann. Rpt., Pt. 3, p. 1-65.

We also have a doctoral thesis by Richard J. Lutton, 1962, Geology of the Bohemia mining district, Lane County, Oregon, which may be examined by your engineers in our library. Various mine maps are also available for inspection in our files.

During the course of your studies of the Bohemia district you might wish to discuss some of the geologic and mining problems with Mr. Harold Barton, a registered consulting mining engineer who has spent many years in the district and is thoroughly familiar with the various aspects related to its mineral development. Mr. Barton may be addressed at Route 4, Box 319, Eugene, Oregon 97401.

Sincerely yours,

Ralph S. Mason
Mining Engineer

U.S.A.

Dear Sir:

I am writing to you with a request to obtain some information from your offices.

I am at present, the President of Black Butte Mining Inc., a producing quicksilver mine located in the County of Lane, Southwestern Oregon, approximately 17 miles from Cottage Grove, on U.S. No. 5 Freeway via London.

I presently hold an option from William J. Bartels Sr. of 704 Whiteaker Avenue in Cottage Grove to purchase the following claims and would appreciate all information in reference to the following claims.

I would appreciate receiving all surveys, reports, maps, etc. in order to have my engineers study all available documents.

The claims are as follows :

- 1.) The group of claims known as the Noonday (also known as the Annie) group consisting of five claims as follows :
 - a.) Maggie
 - b.) Fraction
 - c.) Annie
 - d.) Henry
 - e.) Emma
- 2.) Bohemia, also known as Knot mine
- 3.) Mandy claim
- 4.) Encelsar East claim
Buck claim

I would appreciate having all the above information as soon as possible.

Yours truly,

I.M. Kirsch
I.M. KIRSCH, President

cc: Mr. William J. Bartels Sr.
