Mr John Curt Allen  
Portland Ore.

Dear Mr Allen -

Thanks for the Ore Bin and Book.

Agreeable with your request I have drawn a crude sketch of the upper tunnel on the Gold Eagle, and also of the High Prairie, and since you have been on the ground you may be able to understand what I tried to explain by the chart, namely - Location of Samples, Description of Samples, and assay result. However if this is not satisfactory, I will be pleased to try it again at your request. I expect to be in Portland before long and will call around to see the report and say Hello.

Sincerely yours  
G. W. Thompson
