To: Grants Pass Field Office

Should you folks have a copy of John Allen's Harper Pumicite
(silica) report in your files, then be sure to staple this thereto.

Mr. Ralph Mason
State Dept. of Geology and Mineral Industries
1069 State Office Bldg.
Portland, Oregon

Dear Ralph:

Enclosed is my "Harper Pumicite" report which is supplement #1 to Johnny Allen's original of 1939 and which provides the first-hand analytical data that John was unable to have made at the time he wrote his report. Because the analyses of my samples confirms John's refractive index indications in all respects and shows the owner-furnished analyses to be spurious as John obviously suspected they were but couldn't prove due to the lack of analytical facilities available to him, I believe it would be best to staple my report to John's so as to keep both together as an integrated package for pass-out purposes in the event we get requests for same in the future.

Sincerely,

N. S. WAGNER
