*Re: Calico Resources - Wetland Baseline Data Review*

Dear Nancy:

On September 22, 2017, Calico filed revised *Environmental Baseline Study Work Plans* for the Calico Grassy Mountain proposed mining project. The work plans included a section on wetlands (See section 3.6).

As understood, the methodology for the wetlands baseline data work plan is primarily encompassed in the required filing and procedures stipulated by the Oregon Department of State Lands (DSL), i.e., the wetland delineation report and the requirements described in Oregon Administrative Rules 141-090.

DOGAMI has received that response from DSL where DSL has agreed that the wetland delineation report was accurate for the purpose of determining jurisdictional wetlands in the project area. Therefore, DOGAMI acknowledges that the approved methodology for wetland has been followed.

Please let me know if you have any questions or need additional information from DOGAMI on this topic.

Sincerely,

Randy Jones  
Chemical Process Mining Coordinator  
Oregon Department of Geology and Mineral Industries
