

The Department of Geology and Mineral Industries (DOGAMI) is excited to announce the launch of our new online permitting system, DEPS!

What is DEPS?

The DOGAMI e-Permitting System (DEPS) has been created to streamline applications and permit processes that were previously done through a paper submittal process.

Supported Permit Types:

- Aggregate Surface Mining
- Non-aggregate Surface Mining
- Chemical Process Mining
- Exploration
- Oil & Gas Wells
- Geothermal Wells

Why are we transitioning to an online system?

The activities and industries we regulate, along with the general public, need better access to information, faster turn-around times and easier payment methods. We are working to meet those needs!

Key Features

Online Payments: Pay invoices and fees online using e-Check and ACH payments.

24/7 Access to Information: Check the status of your submitted applications, upcoming reporting obligations, permit renewal dates, scheduled inspections, pay invoices and correspond with DOGAMI – MLRR staff.

24/7 Access to Public Records: Easily access publicly available records and other public information, such as active applications, issued permits and public notices.

Next Steps & Implementation Timeline

Current permittees will receive information in the next few months about how to create an account and use the DEPS online portal.

We will be launching the DEPS public portal starting Winter 2026 through Spring 2027. We are rolling out each program individually:

1. Chemical Process Mining
2. Surface Mining (Aggregate & Non-aggregate)
3. Exploration
4. Geothermal and Oil & Gas Wells
