5. Type of Work  
 Change Plans  Convert to Injection  Pull or Alter Casing  
 Site and Road Construction  Fracture Test  Multiple Complete  
 Construct New Production Facilities  Shoot or Acidize  Abandon  
 Alter Existing Production Facilities  Repair Well  Other

15. Describe Proposed Operations (Use this space for well activities only. See instructions for current well conditions on reverse)  
Well 77-24 was abandoned on Sept 30 and Oct 1, 1992. The 2" pipe was shot off at a depth of 562' and 26½ joints of 21' pipe were recovered. A 4½" Baker Model S Wireline bridge plug was set at 562'. The hole above the plug was filled with ±2 cubic yards of coarse sand grout. The grout settled ±2 inches overnight. A plate with well name, location, and lease number was welded on the 4" casing stub. The location was smoothed with a backhoe and by hand and restored by spreading logs and rocks over the site.

16. Describe Proposed Operations (Use this space for all activities other than well work)

17. I hereby certify that the foregoing is true and correct
