Micropaleontological Report on Ditch
Samples from 300' to 1400'
By W. J. Classen, Jr.

MR. W. P. WINHAM:

ATTENTION: MR. T. J. ETHERINGTON

Due to the undiagnostic nature of the impoverished arenaceous faunule within the interval 300' to 1400', no age assignment on the basis of foraminifers is possible.
