

INDUSTRIAL PROPERTY TAX GETS NEW IT SYSTEM IN 2025

About the system

The Oregon Department of Revenue is developing a new information technology (IT) system for industrial property tax. Your filing process will not change this year (2024-25). You will file in the new system for the 2025-26 tax year with a January 1, 2025 assessment date and a March 15, 2025 filing deadline.

The system will be available in a secure online services portal using a Microsoft platform. It will eliminate the need for emailed and mailed returns, provide access to forms and information, and provide account and asset detail. You also can designate authorized users, communicate securely, and exchange confidential taxpayer information.

The department will provide you with training opportunities to learn the new system.

Benefits

Modern services

Work in one system

Secure and safe online filing

Improved transparency

Chat assistance

Alerts and reminders

Real time updates
