Farm Liquidation Long-Term Capital Gain Tax Rate (ORS 316.045)

You may qualify for a reduced tax rate if you sold or exchanged capital assets used in farming activities. The sale or exchange must end all your ownership interests in a farming business, or stop all your ownership interests in property that is used in a farming business. If you have a net loss from the sale or exchange from **all** assets during the year, you won't qualify for the reduced rate on the sale of farm assets.

Farming activities include:

- Raising, harvesting, and selling crops.
- Feeding, breeding, managing, or selling livestock, poultry, fur-bearing animals, honeybees, or the produce thereof.
- Dairying and selling dairy products.
- Stabling or training equines, including providing riding lessons, training clinics, and schooling shows.
- Breeding, growing, maintaining, or harvesting aquatic species, birds, and other animal species.
- Growing and harvesting cultured Christmas trees or certain hardwood timber.
- On-site constructing and maintaining equipment and facilities used in farming activities.
- Preparing, storing, or disposing of products or by-products raised for human or animal use on land employed in farming activities.
- Any other agricultural or horticultural activity, animal husbandry, or any combination of these three.

Farming activities **don't** include growing and harvesting trees of a marketable species other than growing and harvesting cultured Christmas trees or certain hardwood timber.

You may not claim the reduced tax rate on a sale or exchange to a relative, as defined under Internal Revenue Code Section 267. A farm dwelling or farm home site isn't considered to be property used in the trade or business of farming.

Partnerships or S corporations. The sale of ownership interests in a farming corporation, partnership, or other entity qualify for the reduced tax rate. The taxpayer must have had at least a 10 percent ownership interest in the entity before the sale or exchange.
