# I. Introduction

Oregon's property tax is one of the most important sources of revenue for the public sector in Oregon. This source raised nearly \$4.7 billion for local governments in FY 2008-09. Only state personal income tax collections exceed property tax collections as a source of state and local tax revenue.

This publication describes Oregon's property tax system through the presentation of statistical information. Specifically, it presents assessed values, market values, and taxes imposed by county and type of taxing district. In addition, the publication contains a brief overview of how Oregon's property tax system has changed since 1990. The subsequent sections of this document contain the following:

- The Highlights section makes observations about distinguishing features of FY 2008-09 and recent trends in Oregon's property tax system.
- The Basic Property Tax Concepts in Historical Context section briefly describes the changes that were brought about by Measure 5 and Measure 50 in the 1990s and discusses the basic terms used throughout the publication.
- The section, How the Property Tax System Works, explains the steps of the property tax process in Oregon and connects it with the statistical tables in the Detailed Tables section. These tables contain information on property values and taxes imposed, by both county and type of district. Taxes collected and uncollected by county are also included.
- Finally, the Appendix contains a glossary of the terms used in the publication.

The information in this publication is presented primarily at the county or district-type level. Property values reported within this publication are based upon a January 1 assessment date for the fiscal year reported. For example, values reported for FY 2008-09 are based upon an assessment date of January 1, 2008. Additional information about property taxes is available in three other Department of Revenue publications:

- *Oregon Property Tax Statistics Supplement, Fiscal Year 2008-09* contains information about individual taxing districts;
- The recent history of property taxation is discussed in *A Brief History of Oregon Property Taxation*;
- Information about property tax exemptions can be found in the *State of Oregon 2009-2011 Tax Expenditure Report*.

All these reports are available at [www.oregon.gov/DOR/STATS/](http://www.oregon.gov/DOR/STATS/) .

## II. Highlights

The total real market value of property in Oregon in FY 2008-09 was \$525 billion<sup>1</sup>, an increase of 4.8 percent from the previous year. This growth rate continues the trend of increasing property values, but has substantially slowed down from 15.4 percent in FY 2007-08 and 19.7 percent in FY 2006-07.

Growth in total assessed value, the value subject to tax, was 5.3 percent in FY 2008-09, an increase of \$15 billion to \$295 billion. Assessed values of individual properties are generally limited to 3 percent growth per year, so this additional increase above 3 percent indicates additional value from property improvements, new construction, and exceptions. Assessed value of residential property represents 52 percent of all assessed property value (this rises to 61 percent when tract property available for development is included). Three Portland area metropolitan counties (Multnomah, Washington, and Clackamas) are responsible for 53 percent of the residential property value in Oregon.

<b>Exhibit 1</b>			
<b>Summary of Oregon Property Values and Taxes Imposed</b>			
<b>(\$ million)</b>			
	2007-08	2008-09	Percent Change
Real Market Value*	501,125	525,329	4.8%
Total Assessed Value*	280,454	295,211	5.3%
Net Assessed Value*	271,355	285,424	5.2%
Operating Taxes	3,676	3,871	5.3%
Bond Taxes	603	608	0.9%
Total District Taxes	4,279	4,479	4.7%
Urban Renewal Taxes	192	197	3.0%
Total All Taxes	4,470	4,676	4.6%

\* For a discussion of the terms please refer to section III, Basic Property Tax Concepts in Historical Context and the Glossary.

Statewide, the slowdown in the growth of real market values caused the ratio of assessed value to market value to increase slightly from 55.9 percent in FY 2007-08 to 56.2 percent in FY 2008-09.

Property taxes imposed in Oregon totaled nearly \$4.7 billion in FY 2008-09, an increase of 4.6 percent from FY 2007-08. Since 1997-98, the first fiscal year following implementation of Measure 50, growth in property taxes imposed has averaged just under 6 percent. The increase in revenue for FY 2008-09 can be attributed primarily to growth in assessed property values.

More than 1,200 districts impose property taxes in Oregon. Exhibit 2a on the following page illustrates the relative share of property taxes that each type of district imposes, with schools receiving the largest share of property tax revenue (43 percent of the total). Cities (22 percent) and counties (19 percent) are the next largest district categories. Special districts, such as fire, road, water, hospital, park, and port districts represent the largest number of districts, but only impose 12 percent of the taxes. These shares remained unchanged from the previous year.

<sup>1</sup> This reflects property values as of January 1, 2008.

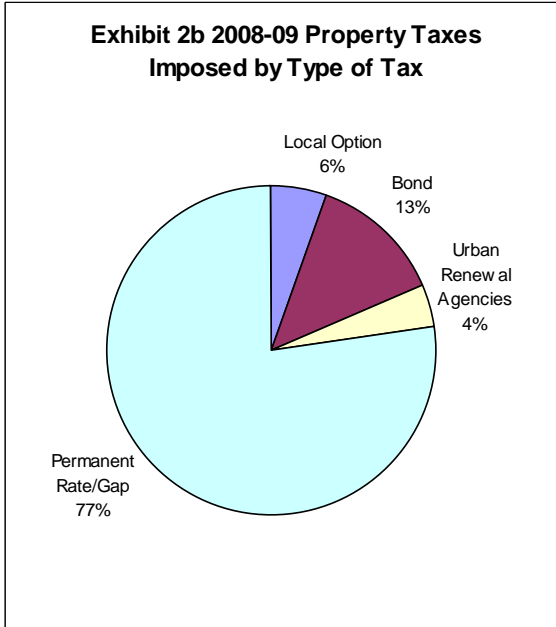

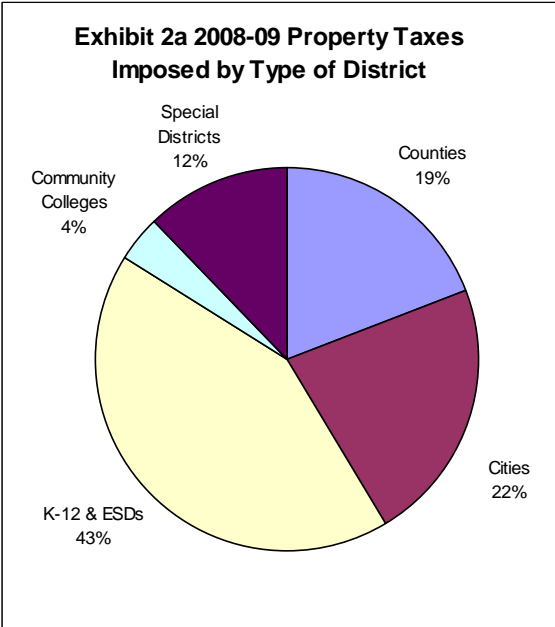

Exhibit 2b shows the four primary components of property tax revenue: 1) permanent rate and gap bond levies, 2) local option levies, 3) bond levies, and 4) urban renewal revenues. Taxes from permanent rate and gap bond levies are the most significant portion of property taxes, representing 77 percent of all property taxes imposed. The shares of these four types of taxes in total revenue remained unchanged from the previous year.

Exhibit 3 on the following page presents a composition of taxes by type of taxing district for FY 2007-08 and FY 2008-09. It is worth noting that statewide figures presented here result from a wide range of individual district characteristics. For example, over a hundred districts did not impose taxes in FY 2008-09. These were mostly road, water, or sanitary districts. When large districts have substantial changes in their taxes, they can noticeably impact the statewide numbers. The largest 25 districts accounted for over a quarter of all district property taxes imposed in FY 2008-09. Information about specific districts is available in the *Oregon Property Tax Statistics Supplement*, available at [www.oregon.gov/DOR/STATS/statistics.shtml](http://www.oregon.gov/DOR/STATS/statistics.shtml).

Special Districts	416	446	7.2%	28	37	28.9% **	71	68	-4.6%	516	551	6.8%
Total District Taxes	3,417	3,608	5.6%	259	263	1.7%	603	608	0.9%	4,279	4,479	4.7%
Urban Renewal Agencies										192	197	3.0%
Total										4,470	4,676	4.6%

\* Two local option taxes for the City of Portland expired in 2008-09 contributing to the large decrease in statewide city local option taxes imposed.

\*\* Several special districts began new local option taxes in 2008-09 contributing to the growth in local option taxes imposed.

Several points from this table are worth noting:

- Combined taxes from permanent rates and gap bond levies grew by 5.6 percent in FY 2008-09. This is the largest component of total taxes, ranging from 75 percent for K-12 and community colleges to 90 percent for cities.
- Local option taxes increased by 1.7 percent during the last year. The increase came from counties, special districts, and school districts (K-12). Community college districts could use local option levies beginning in 2001, but none have so far. Local options are not available for education service districts (ESDs).
- Bond revenues, the primary funding for capital projects, increased by 0.9 percent. The main contributors were school districts and community colleges.
- Local option and bond levies are used by a majority of K-12 districts in the state. More than 62 percent of K-12 school districts imposing tax had a local option or bond levy in FY 2008-09. Statewide, 26 percent of property taxes imposed by K-12 districts are collected through these alternative mechanisms. Some districts rely higher on bonds and local option levies than others.
- Urban renewal revenue increased 3 percent in FY 2008-09 after increasing by 16.2 percent in FY 2007-08. Slower revenue growth in FY 2008-09 was due primarily because many urban renewal agencies chose not to impose a special levy for the year. Seventy-nine urban renewal plan areas increased the amount of revenue they received in FY 2008-09, while 13 plan areas raised less revenue than the previous year. Eight new plan areas in Clackamas, Clatsop, Douglas, Hood River, Jefferson, Lane, Linn, and Marion counties were added in FY 2008-09.

### III. Basic Property Tax Concepts in Historical Context

To understand the current structure of Oregon's property tax system, it is helpful to view the system in a historical context. Although local governments in Oregon began taxing property before statehood, the structure of the tax changed very little until the 1990s, when two statewide ballot measures dramatically altered the system. To find more detailed information on the history of Oregon property taxes, please refer to the publication "A Brief History of Oregon Property Taxation" that can be found at [www.oregon.gov/DOR/STATS/statistics.shtml](http://www.oregon.gov/DOR/STATS/statistics.shtml).

Measure 5, which introduced tax rate limits, was passed in 1990 and became effective beginning in the 1991-92 tax year. Measure 50, passed in 1997, cut taxes, limited assessed value growth, and replaced most tax levies with permanent tax rates. It transformed the system from one primarily based on levies to one primarily based on rates. When implemented in 1997-98, Measure 50 cut effective tax rates an average of 11 percent from their 1996-97 levels.

**Pre-Measure 5.** Prior to Measure 5, Oregon had a *pure levy-based* property tax system. Each taxing district calculated its own tax levy based on its budget needs. County assessors estimated the real market values of all property in the state. The levy for each taxing district was then divided by the total real market value in the district to arrive at a district tax rate. The taxes each district imposed equaled its tax rate multiplied by its real market value. The tax rate for an individual property depended on the combination of taxing districts from which it received services. Taxes for each property were calculated by adding the tax rates for the relevant taxing districts to arrive at a consolidated tax rate. That tax rate was multiplied by the assessed value of the property to determine the tax imposed on that property. Most levies were constitutionally limited to an annual growth rate of 6 percent, and levies that would increase by more than 6 percent required voter approval.

**Measure 5.** Starting in 1991-92, Measure 5 introduced limits on the taxes paid by individual properties. The limits of \$5 per \$1,000 real market value for school taxes and \$10 per \$1,000 real market value for general government taxes apply only to operating taxes, not bonds.<sup>2</sup> If either school or general government taxes exceeded their limits, then each corresponding taxing district would have its tax rate reduced proportionately until the tax limit was reached. This reduction in taxes to the limits is called *compression* and the resulting amount of reduction is called *compression loss*.

Measure 5 resulted in a system that was a *hybrid of levy-based and rate-based* systems. For properties where the school and general government taxes were below the limits, the process resembled a levy-based system; taxes imposed depended on levies. For properties where the calculated taxes exceeded the limits, and hence the tax rates were fixed at the limits, the process more closely resembled a rate-based system because the taxes imposed depended on real market values.

**Measure 50.** The objective of Measure 50, passed in 1997, was to reduce property taxes in 1997-98 and to control their future growth. It achieved these goals by cutting the 1997-98 district tax levies, and by making three changes: switching to permanent rates, reducing assessed values, and limiting annual growth of assessed value. Districts were allowed to continue gap bond levies to meet the funding commitments that were made prior to 1996.

*Assessed value* (AV) is value of the property subject to taxation. Assessed value was separated from real market value beginning in tax year 1997-98 when it was set at 90 percent of the 1995-96 real market value.

---

<sup>2</sup> The limit for school taxes was \$15 per \$1,000 real market value in 1991-92. It was reduced by \$2.50 each year until it reached a rate of \$5 per \$1,000 real market value in 1995-96.

*Real market value* (RMV) of property is the amount the assessor has calculated the property could sell for in an arm's length transaction on January 1 of the assessment year. It is used to establish Measure 5 value and, for new property added to the roll, is a significant factor in establishing the assessed value. Assessed value for a new property is calculated by multiplying real market value by the *changed property ratio* (CPR). The CPR is the ratio of assessed value divided by real market value for unchanged properties. *Measure 5 value* is used to check \$5 and \$10 per \$1,000 rate limits set forth in the Oregon Constitution by Measure 5. It is equal to real market value with exception of specially assessed farm and forest lands.

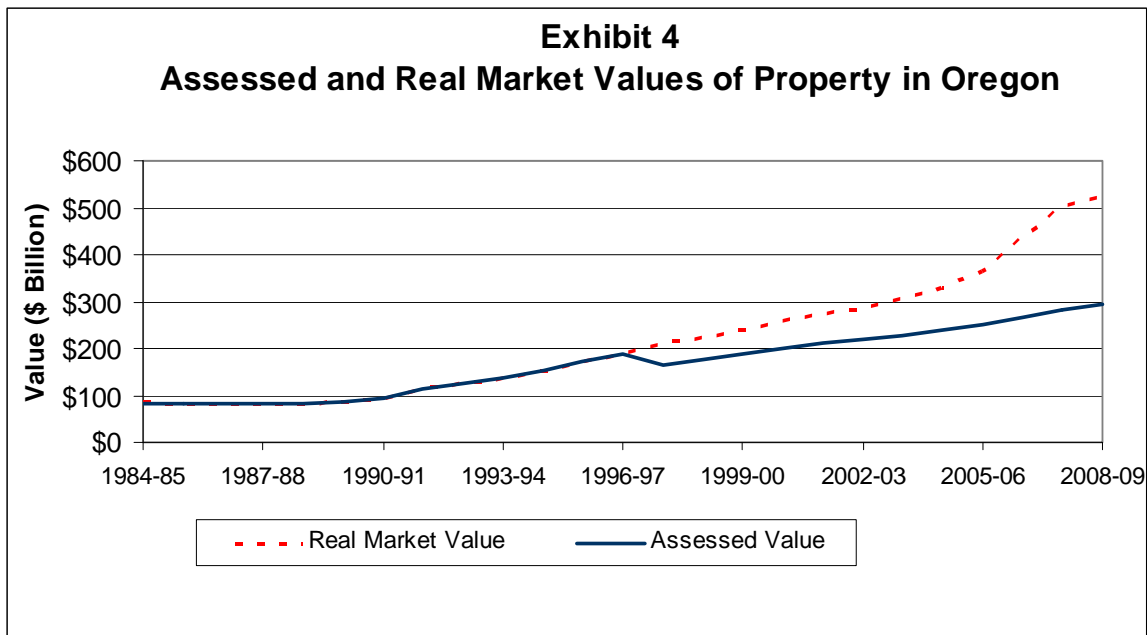

Exhibit 4 displays the total market and assessed value dynamic for the past 25 years. After relatively modest growth through the late 1980s, property values began growing rapidly by an average annual rate of 11.6 percent from 1989-90 through 1996-97.

Due to Measure 50 requirements, 1997-98 total assessed value fell 12.5 percent below the prior year and 21 percent below the 1997-98 real market value. Since 1997-98, statewide assessed value has been increasing each year. However, from 1997-98 through 2007-08, assessed value grew at a rate slower than real market value because assessed values of unchanged individual properties are subject to a 3 percent annual growth limit.

Two possible sources of assessed value growth are changes in the value of existing property and construction of new property. Some properties can experience a decline in assessed value, such as business personal property, which depreciates, or property that has experienced a decrease in real market value to a level below its assessed value. New property, such as a newly constructed home, represents a new source of assessed value. Some other sources of new value include improvements, in which an addition to a house significantly increases the home's value, or rezoned property, in which a change in zoning laws could increase the value of a property more than 3 percent in the year that the change took place.

Both Measure 5 and Measure 50 were aimed at limiting property taxes. Exhibit 5 displays the trend in Oregon property taxes imposed. For many years prior to the 1990s, statewide property taxes had grown steadily. The limitations of Measure 5 and Measure 50 resulted in nearly a decade without significant overall growth. Toward the end of the 1990s, the steady growth returned. Although the limitations of Measures 5 and 50 are still active, several factors have led to the recent increases: significant increases in assessed values, new local option taxes, and new bonds. But recent growth has been slower: property taxes imposed have grown an average of about 6 percent per year since 1997-98, compared to about 9 percent growth per year during the 1980s.

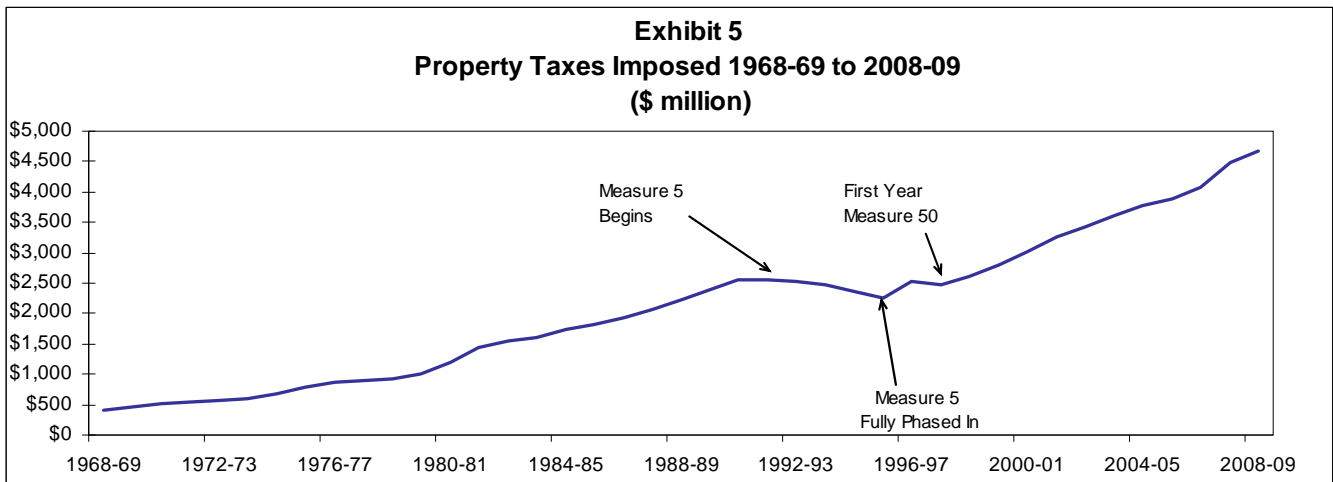

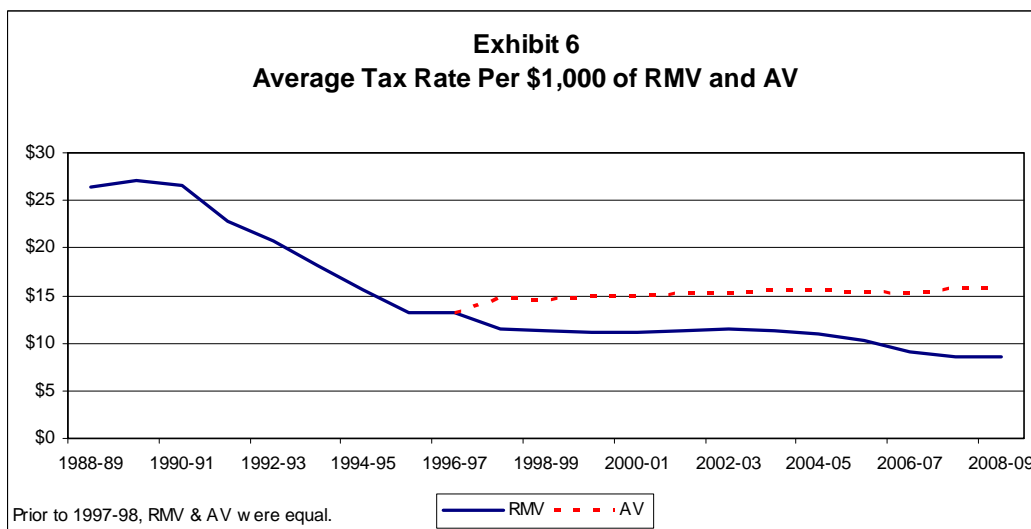

Exhibit 6 provides another angle to look at the reduction in property taxes due to Measures 5 and 50. It shows the dynamics of average tax rate per \$1,000 of assessed and real market value. At the beginning of the 1990s the rate was about \$27 per \$1,000 of real market value. Now it is less than \$10 per \$1,000 of real market value and slightly higher than \$15 per \$1,000 of assessed value.

Yet another way to interpret the effects of Measures 5 and 50 is in terms of the relationship between property tax and personal income. Exhibit 7 shows the share of Oregon personal income that property taxes represent. Prior to the limits of the 1990s, the percentage of personal income going to property tax was fairly stable at around 5 percent. Through the 1990s, the percentage dropped to around 3.5 percent and has remained there.

## IV. How the Property Tax System Works

This section provides an overview of the property tax process and introduces the related detailed tables in section V. The subsection “Assessment” explains the process of assigning taxable values to properties. The subsection “Tax Authority and Tax Due Calculation” provides an overview of types of taxes and an explanation of how tax limits are tested. The subsection “Urban Renewal” explains operations of urban renewal agencies. The subsection “Tax Collections” explains when and how property taxes are collected. The subsection “Tax Relief” describes tax relief programs that are currently in effect. The final subsection, “How Property Taxes are Determined for an Individual Property” offers an example of how property tax imposed is calculated for a hypothetical property. More extensive information on these topics can also be found at [www.oregon.gov/DOR/PTD/property.shtml](http://www.oregon.gov/DOR/PTD/property.shtml).

### **1. Assessment**

#### **General Procedure**

The process of identifying and assigning a value to taxable property is called assessment. The county assessor administers most property assessment and prepares the assessment roll, which is a listing of all taxable property as of January 1 of each year. Assessment is performed to identify the tax base to which tax rates apply. Table 1.1 shows AV by county and property class. Table 1.2 shows RMV and AV by county, and type of property. The Oregon Department of Revenue assesses some property, including public utilities and large industrial properties with an improvement value greater than 1 million. Utility property is placed on a separate assessment roll, which is transferred to the county assessment roll prior to the preparation of tax bills. Small railcar utility properties, which represent a small piece of total value, cannot be attributed to specific counties. Assessors do not put the value of small railcars on the roll: owners of these utilities pay taxes to the state, which then distributes the monies to counties. Table 1.3 shows the AV of state centrally assessed utilities by utility type.

Since the implementation of Measure 50 in 1997-98, assessors have kept track of both assessed value and real market value for each property.

*Net assessed value* (NAV) is the value used to calculate district tax rates for dollar levies and is calculated by summing assessed value, state fish and wildlife property value, nonprofit housing property value, and subtracting urban renewal excess value (see Table 1.4 for breakdown of values). Both state fish and wildlife property, and nonprofit housing property are added to total assessed value, because, while they do not pay property taxes directly to taxing districts, the State makes equivalent payments to taxing districts. Because property tax revenues derived from urban renewal excess value go to urban renewal agencies instead of local taxing districts, NAV does not include urban renewal excess value.<sup>3</sup> Table 1.5 provides the information on RMV and NAV by type of taxing district, while Table 1.6 has a breakdown of RMV and NAV by county.

#### **Exemptions and Special Assessments**

Certain property owners receive exemptions from property taxation or have their properties assessed in a special way. The value of an exempt property is adjusted prior to being placed on the roll by the assessor. When the Legislature decides to grant such exemptions, it is usually done to pursue socially

---

<sup>3</sup> Please see subsection 3, Urban Renewal, for more information.

desirable outcomes such as: helping educational and charitable organizations, encouraging new businesses to relocate to Oregon, and protecting wildlife and forestlands. Property can also be exempt from taxation because of the complexity associated with taxing the property (e.g., personal property for personal use).

The three primary ways of reducing the assessed value of property are:

- *Full exemption:* A property is wholly exempt from taxation.
- *Partial exemption:* Partial exemptions exist in several different forms. For example, a program may exempt only a percentage of value. Partial exemptions also result when taxable value is frozen at a point in time, and all additions to value are exempt from taxation.
- *Special assessment:* Specially assessed properties are valued using an assessment technique that results in a lower taxable value than would be the case if the usual assessment practice were used. Two types of land can be specially assessed – forestland and farmland.

Table 1.7 presents AV and RMV by county for three broad categories of exemptions: public exemptions (mostly property owned by governments of different levels), social welfare exemptions, and business, housing and other exemptions. Table 1.8 provides AV and RMV for farm land and forestland by county. Assessed value in this case denotes assessed value of the specially assessed property.

Detailed information on property tax exemptions and special assessment can be found in the *2009-2011 State of Oregon Tax Expenditure Report*, a companion document to the *Governor's Budget*, available at [www.oregon.gov/DOR/STATS](http://www.oregon.gov/DOR/STATS).

### **Assessment Appeals**

A property owner or other person who holds an interest in a property that obligates the person to pay the taxes imposed on the property can appeal the valuation of the property to the local Board of Property Tax Appeals. Petitions to the Board must be filed between late October, when the tax statements are mailed, and December 31. Petitions are filed in the office of the county clerk in the county where the property is located.

If a property owner or assessor is unhappy with the board's decision regarding property value, he or she may appeal to the Magistrate Division of the Oregon Tax Court. Magistrate decisions can be appealed to the Regular Division of the Tax Court. Decisions of the Regular Division of the Tax Court can be appealed to the Oregon Supreme Court.

Owners of industrial property appraised by the Oregon Department of Revenue may choose to file their appeals directly with the Magistrate Division of the Oregon Tax Court, rather than with the Board of Property Tax Appeals. Detailed information about the appeal process can be found at [www.oregon.gov/DOR/PTD/docs/303-415/15-tax\\_appeal.pdf](http://www.oregon.gov/DOR/PTD/docs/303-415/15-tax_appeal.pdf).

Table 1.9 contains information about accounts appealed, the AV of appealed accounts, and reductions that resulted from BOPTA decisions.

## **2. Tax Authority and Tax Due Calculation**

### **Tax Authority and Types of Taxes**

Oregon statutes allow for the establishment of a wide variety of local entities which can impose tax to provide services. Examples include counties, cities, school districts, sanitary districts, and water control districts. Most properties in Oregon receive services from five to 10 different taxing districts. There are more than 1,200 districts that impose property taxes in Oregon.

Property taxes are composed of three primary parts: 1) permanent rate and gap bond levies, 2) local option levies, and 3) bond levies. Taxing districts can utilize any of these three types of taxes. In addition, urban renewal agencies get a portion of their revenue from permanent rates and can also impose special levies.<sup>4</sup>

*Operating levies* include permanent rate taxes, local option taxes, and gap bond levies.

Measure 50 established *permanent rates* for each tax district based upon operating taxes that each district historically had charged prior to the measure. Districts are allowed to impose tax on properties up to their authority by notification to the county assessor. Voter approval is not required except to establish permanent rates when new taxing districts are formed.

Districts can, with voter approval, establish temporary taxing authority in addition to their permanent rate authority. Typically, *local options* are established to fund specific operations of a district such as road repair or the operation of a library.

*Gap bond levies* are operating levies used to pay off indebtedness that was incurred prior to the passage of Measure 50. The indebtedness had been paid out of operating taxes prior to passage of Measure 50, and to protect that ability to pay indebtedness, Measure 50 allowed for the gap bond operating taxes to continue to be imposed beyond the permanent rate authority. Because these levies were not part of the Measure 50 permanent rate calculations in 1997, after the indebtedness has been paid off, they are reduced and then added to the permanent rate authority. This preserves the districts' operating tax authority at a level that would have been calculated if the gap bond levies had been pulled into the permanent rates in 1997.

*Bonds* require voter approval and represent a levy that is exclusively used to fund construction and other capital projects.

Table 2.1 shows taxes levied by type of tax and county, while Table 2.2 shows the same information broken down by type of taxing district for FY 2008-09.

### **Determination of Tax and Compression**

Measure 50 replaced most tax levies with permanent tax rates. County assessors compute tax rates for dollar based local option levies, bond levies, and urban renewal special levies by dividing levy amounts by the net assessed value within the taxing district. Those rates are then added to the permanent rates to compute the total rate to be extended to a property. The *tax extended* to a property is the total tax rate multiplied by the assessed value of the property.

---

<sup>4</sup> See subsection 3, Urban Renewal, for more information.

Since Measure 5 limits must be tested, tax extended is not necessarily the tax imposed. The limits are \$5 per \$1,000 Measure 5 value for education taxes, and \$10 per \$1,000 Measure 5 value for general government taxes. These limits are applied only to operating taxes, not bond levies. For each property, the assessor compares education taxes with the education limit and other governmental taxes with the general government limit. If property taxes exceed the Measure 5 limits, then taxes are *compressed* in a specific order until they meet the limit. First, local option taxes are proportionally reduced, possibly to zero. If there are no local option taxes or they have been reduced to zero, the permanent tax rates for each taxing district are then reduced proportionately.<sup>5</sup> Total tax after compression is called *tax imposed* and is the amount billed to the property owners.

Table 2.3 shows tax extended, tax imposed and compression amounts by county and Table 2.4 provides the breakdown by type of taxing district. Tables 2.5 and 2.6 demonstrate changes in tax imposed (both inside and outside the measure 5 limit) and compression, by county and by type of taxing district for FY 2007-08 to FY 2008-09.

### **3. Urban Renewal**

In Oregon, urban renewal agencies receive the bulk of their revenues through a *tax increment financing* mechanism. Urban renewal agencies can be approved by counties or cities with the objective of eliminating blight within an area. Urban renewal agencies do not have the authority to impose taxes (except for special levies), but they do get a portion of the property tax revenue that would otherwise have gone to taxing districts if the agency did not exist. When an urban renewal plan area is created (plan areas are created and administered by urban renewal agencies), the assessed value of the property within the area's boundaries is frozen, at the amount calculated from the most recently certified tax roll prior to the plan's approval. The agency then raises revenue in subsequent years from any value growth above the frozen amount; this value growth is referred to as the *increment* or *excess value*.

A tax rate is calculated for the urban renewal plan as the consolidated tax rate for the taxing districts within the geographic boundaries of the plan. These urban renewal taxes, referred to as "tax off the increment," are calculated as the consolidated tax rate multiplied by the value of the increment. The sharing of tax between taxing districts that get a portion of the tax imposed on "frozen value" and urban renewal agencies that get the tax imposed on the excess value is also referred to as urban renewal division of tax.

Most urban renewal agencies that have plan areas adopted before December 1996 can also impose special levies. These levies compensate urban renewal agencies for the revenue loss caused by the implementation of Measure 50. Special levies, as well as division of tax revenues, are subject to the tax limitations of Measure 5.

Table 3.1 provides information on the amount of excess value, and the revenue from excess value and special levies, broken down by urban renewal agency, plan area, and county. Table 3.2 shows the amount of increment tax imposed by urban renewal agencies broken down by urban renewal agency, the type of district from which the excess value growth occurred within, and by county.

More information on urban renewal is available at [www.oregon.gov/DOR/PTD/IC\\_504\\_623.shtm](http://www.oregon.gov/DOR/PTD/IC_504_623.shtm).

---

<sup>5</sup> Gap bond levies are reduced also, if present.

#### **4. Tax Collection**

Once the tax rates and Measure 5 tax rate limits are applied to each property, the assessor certifies the assessment roll, and turns it over to the tax collector. The tax collector bills and collects all taxes and makes periodic remittances of collections to taxing districts. Tax statements mailed to property owners list the assessed value of the property and the taxes imposed by each taxing district. Statements also indicate how much is inside and how much is outside the Measure 5 property tax limits and the amount of taxes actually due after the limits have been applied.

Taxes are levied and become a lien on property on July 1. Tax payments are due on November 15 of the same calendar year. Under the partial payment schedule, the first one-third of taxes is due on November 15, the second one-third on February 15, and the remaining one-third on May 15. A discount of 3 percent is allowed if full payment is made by November 15; a 2 percent discount is allowed for a two-thirds payment made by November 15. For late payments, interest accrues at a rate of 1.33 percent per month (16 percent annual rate). If taxes remain unpaid after three years from the beginning of delinquency date, counties then initiate property foreclosure proceedings. Table 4.1 shows tax uncollected for all years, whereas Table 4.2 shows tax uncollected for the FY 2007-2008.

#### **5. Tax Relief**

During the past 30 years, the legislature has created six property tax relief programs. Currently, only two of these programs remain: the Elderly Rental Assistance (ERA) and the Homestead Deferral programs. *The Elderly Rental Assistance* program (ERA) provides tax relief to elderly renters whose rent, fuel, and utility expenses are more than 20 percent of their income. Participants must be at least 58 years old with an annual household income of less than \$10,000. Property they rent must be subject to property tax. An eligible taxpayer is paid by the Department of Revenue an amount equal to the positive difference between the taxpayer's gross rent, not to exceed \$2,100, and 20 percent of household income. If the suspense account designated to hold appropriations from the General Fund to pay assistance does not have enough money to cover all payments for the fiscal year, individual payments may be prorated.

*The Deferral programs* include property tax deferral programs for seniors (62 years and older), disabled homeowners, and a special assessment deferral program for seniors.

Homeowners 62 years or older who meet certain income requirements are able to defer all property taxes. Under the Senior Citizen's Deferral program, the State pays the property taxes of participants and charges the homeowner 6 percent interest on the deferred amount. Homeowners are not required to pay the taxes or interest to the State until they die, sell, or no longer inhabit their home (except for medical reasons). The income eligibility requirement is indexed to inflation and was \$39,000 in 2008. Once approved, senior citizens are eligible for continued deferral in future years so long as their federal adjusted gross income remains below the threshold.

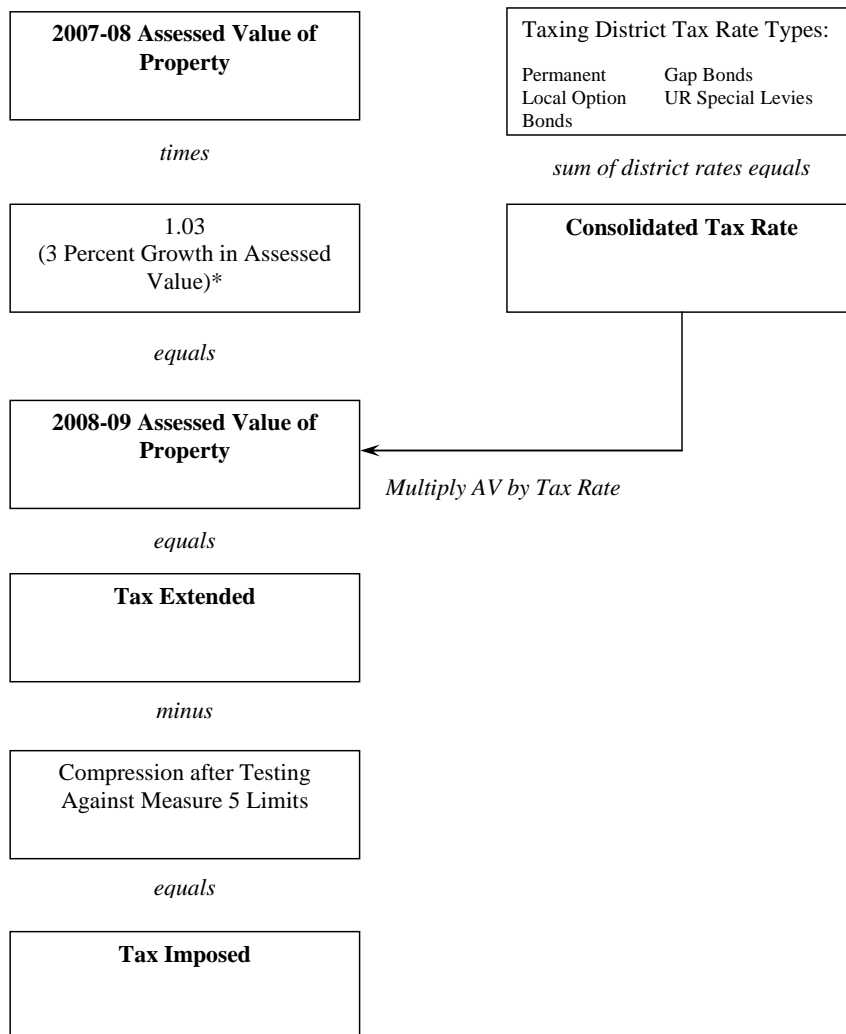

The second deferral program, the Disabled Citizen's Property Tax Deferral program, began in 2001 and is similar to the Senior Citizen's Deferral program in that the same income limits apply, and property taxes are deferred at 6 percent interest. However, this program is for disabled homeowners who are eligible for, or receive Social Security disability benefits. In addition, age limitation does not apply.

The third program, the Senior Citizen's Special Assessment Deferral program, allows qualifying seniors to defer their special assessment charges for public improvements (e.g. sewer or sidewalk improvement charges). The qualifying income limit is the same as the limit for the Senior Citizen's Deferral program.

**6. How Property Taxes are Determined for an Individual Property**

Exhibit 8 shows the process used to determine the property tax bill for an individual property. Most property in Oregon is located within 5-10 taxing districts. Each of these districts will have a billing rate, and the sum of those rates will equal the consolidated tax rate for the property. The assessed value of a property multiplied by the consolidated tax rate results in the tax extended. The non-bond taxes paid to K-12, education service, and community college districts are subject to the Measure 5 education limit of \$5 per \$1000 of assessed value, while the non-bond taxes paid to all other districts are subject to the Measure 5 general government limit of \$10 per \$1000 of assessed value. If either the school or the general government tax-extended amount is greater than the respective Measure 5 limit allows, then the tax is reduced to the limit. In reducing non-bond tax, local option taxes are first reduced to zero, if further reduction is needed after all local option taxes have been reduced, then the non-bond taxes for each district are reduced proportionately. The final tax (non-bond tax plus bond tax) is referred to as the tax imposed, and this is the amount the property owner must pay.

**Exhibit 8: Simplified Property Tax Calculation for a Residential Property**

\* If improvements were made to the property during 2007, then the assessed value could grow more than 3 percent. Assessed value calculation above is for property with real market value greater than assessed value.

## V. Detailed Tables

In an effort to provide as much useful information as possible, we have included tables with missing data. Where data were missing, the gaps are clearly identified.

The county assessor offices provide all data except for the values for centrally assessed property. There are occasional discrepancies in the tables as a result of inconsistencies in the data reported by counties. Rather than letting these data problems prevent the publication of available information, we attempt to provide available information as clearly as possible. Because this publication is designed to be a description of the property tax system using true and correct figures, we generally have not included estimates when actual data were unavailable.

The order and names of the tables provided in this year's publication have changed from previous years. The key below details the new and old table numbers.

Notes: The category "Other" includes taxing districts such as library, transit, and public utility districts. Tax rates are applied to net assessed value. It includes nonprofit housing value and state fish and wildlife value and excludes urban renewal excess value. Property taxes imposed excludes special assessments and taxes allocated to urban renewal agencies. Two districts were re-classified as "Other" districts, causing values reported for FY 07-08 "Other" and "Service" districts not to match previous year's publication. The number of taxing districts reported includes unique taxing district areas of districts that imposed tax in FY 2008-09 and therefore may overstate or understate the number of actual taxing districts in the State. Districts that cross county boundaries are counted only once.

Notes: The category "Other" includes taxing districts such as library, transit, and public utility districts. Two districts were re-classified as "Other" districts, causing values reported for FY 07-08 "Other" and "Service" districts not to match previous year's publication. Total Tax Imposed may not equal the sum of its components due to data discrepancies and rounding at the individual account level. Gap Bonds include the city of Portland pension levy.

Notes: The category "Other" includes taxing districts such as library, transit, and public utility districts.  
 Two districts were re-classified as "Other" districts, causing values reported for FY 07-08 "Other" and "Service" districts not to match previous year's publication.  
 Total Tax Imposed may not equal the sum of its components due to data discrepancies and rounding at the individual account level.  
 Urban renewal revenues are not included in this table.

## **Detailed Tables: Urban Renewal**

Table 3.1 – Urban Renewal Excess Value Used and Revenue for 2007-08 and 2008-09 by Urban Renewal Plan Area.

Table 3.2 – Sources of Urban Renewal Division of Tax Revenue for 2007-08 and 2008-09 by County, Type of Levy, and District Type.

## Appendix: Glossary

**Additional taxes.** Revenues for taxing districts, including penalty upon reclassification, as a result of various statutory provisions:

- **Farmland.** Additional tax and penalty paid when farmland changes use and becomes ineligible for farm use assessment.
- **Forestland.** Additional tax and penalty paid when forestland becomes ineligible for forestland assessment.
- **Small tract.** Additional tax and penalty paid when land becomes ineligible for Western Oregon Small Tract preferential tax treatment.
- **Open space.** Additional tax and penalty paid when open space land becomes ineligible for preferential tax treatment.
- **Historic property.** Additional tax and penalty paid when property is no longer used as a historic site.
- **Late filing fee.** Penalty amount paid for failure to file a personal property return on time under ORS 308.302.
- **Clerical error.** Additional tax paid as a result of the correction of a clerical error under ORS 311.206.
- **Other.** Other additional taxes and penalties, such as those resulting from a reclassification of an enterprise zone (ORS 285.617) or riparian land (ORS 308.798).

**Arm's length transaction.** Transaction between an informed buyer and informed seller who are not related or on close terms, and who are presumed to have roughly equal bargaining power not involving a confidential relationship.

**Assessed value.** Value of property subject to taxation. Under the provisions of Measure 50, assessed value for the 1997–98 fiscal year was set at 90 percent of the 1995–96 assessed value for each property in the state. The assessed value for each property is allowed to grow a maximum of 3

percent per year (unless a significant change to the property occurs), but cannot exceed the real market value of the property. Assessed value does not include the exemptions allowed for property.

**Assessment.** The process of identifying and assigning a value to taxable property.

**Assessment roll.** A listing of all taxable property in a county as of January 1 of each year.

**Average tax rate.** Average rate computed for an area by dividing the taxes imposed in that area by the net assessed value of taxable property.

**Billing rate.** Tax rate expressed in dollars per \$1,000 of assessed property value.

**Board of Property Tax Appeals (BOPTA).** County board that hears taxpayer appeals of property assessment. Property owners can file appeals between October 25 and December 31, after they receive their property tax bill. Refunds are granted when appeals are successful. Taxpayers may appeal the BOPTA decision to the Magistrate Division of the Oregon Tax Court.

**Bond levy.** Amount of levies needed to pay principal and interest on district bonded debt.

**Business, housing, and miscellaneous exemptions.** Exempt value of certain business, housing, and miscellaneous other properties that are partially or totally exempt from property taxation. The qualifying exemptions include:

- **Veterans' exemptions.** Exemption applies to the assessed value of the homesite and personal property of a disabled veteran or their surviving spouse.
- **Historic property.** Improved property that has been specially assessed due to its historic designation.
- **Enterprise zones.** Certain business properties within designated enterprise zones that qualify for exemption for a limited number of years, under provisions included in ORS Chapter

285C. To be eligible, a business must meet several conditions relating to type of business activity and requirements for hiring and investment.

- **Commercial facilities under construction.** Certain commercial buildings in the process of construction that qualify for exemption from property taxation for not more than two consecutive years, under ORS 307.330 and 307.340.
- **All other business, housing, and miscellaneous exemptions.** These include alternative energy systems, farm labor camps, fallout shelters, housing for low income rental, multiple-unit housing in core areas, nonprofit homes for the elderly, pollution control facilities, port and airport property leased, etc.

**Centrally assessed property.** Taxable property assessed by the Department of Revenue, including electric and communication utilities, rail transportation, air transportation, water transportation, gas pipelines, private railcars, and others.

**Changed property ratio (CPR).** The ratio of average maximum assessed value to average real market value for unchanged properties. (Averages are determined by property class by county.) This ratio is used in calculating the assessed values of new properties, improvements and other additions to the tax roll. See Oregon Administrative Rule 150-308.156 for establishing a CPR.

**Code area.** Geographic unit established by a county assessor, and identified by a code number representing a unique combination of taxing districts. All properties in a code area pay taxes to the same taxing districts.

**Compression.** Reduction in taxes required by the Measure 5 property tax rate limits approved in 1990. Compression is computed on a property-by-property basis.

**Compression loss.** Amount of reduction in taxes due to compression.

**Consolidated tax rate.** Sum of the billing rates of all taxing districts that impose taxes in a given code area. Billing rates are calculated prior to any compression that may result from Measure 5 property tax rate limits.

**District.** A local government entity that imposes property taxes (e.g., county, city, K-12 school district). A district may cross county lines. For example, the City of Portland District includes taxing districts representing the portions of the city that are located in Clackamas, Multnomah, and Washington counties.

**District tax rate.** Computed by adding together the permanent rate, the local option rate, the gap bond rate, and the bond rate for the district. Tax rate expressed in dollars and cents per \$1,000 of property value.

**Division of tax.** The process of, and revenue from, apportioning tax to urban renewal agencies based on the relationship between the frozen base value and the growth of value (“excess value” or “increment”) of properties in a particular geographic area (urban renewal plan area). The tax is split between urban renewal agency and taxing district in the same proportion as the ratio of excess value to frozen value.

**Equalization.** The process of maintaining uniformity of values among property owners and among various classes of property. Measure 50 made equalization unnecessary because it mandated the calculation of assessed value from a base year value with a 3 percent annual growth limit.

**Excess value.** See urban renewal excess value.

**Exempt property.** Properties that are not taxed under the property tax system. See public exemptions, social welfare exemptions, and business, housing, and miscellaneous exemptions.

**Existing urban renewal plan area.** Urban renewal plan area that 1) existed in December 1996, 2) chose an option (see Urban renewal option), and 3) established a maximum amount of indebtedness by July 1998.

**Farm use special assessment.** Special assessment at less than full assessed value for land. (ORS 308A.062–308A.068).

**Fish and Wildlife.** Total assessed value of state Fish and Wildlife Commission property. While not subject to property tax, the commission makes equivalent payments to counties under ORS 496.340.

**Forestland special assessment.** Special assessment at less than full assessed value of land used for growing timber.

**Frozen base value.** The assessed value of property within an urban renewal plan area at the time that the plan was created.

**Full local option authority.** Estimate of the amount of tax that could be levied if a district were to use the full amount of local option levies passed by voters.

**Full permanent rate authority.** Estimate of the amount of tax that could be levied if a district were to use its entire permanent rate.

**Gap bonds.** Principal and interest obligations of districts that are paid for with operating revenues rather than with the proceeds of a bond levy.

**Joint taxing district.** A taxing district that crosses county lines.

**Levy based property tax system.** Tax system in which levies are determined by budget needs of a taxing district (which in many cases must be approved by voters), and tax rates are calculated as levies divided by total assessed value in a district. The alternative is rate based tax system.

**Local option levies.** Property tax levies beyond the revenues generated by permanent tax rates. Local option levies must be approved by voters in

a general election or an election that has at least 50 percent voter participation.

**Locally assessed property.** Taxable property assessed by county assessors, including real property, personal property, and manufactured structures carried on a separate roll.

**Manufactured structures value.** Total assessed value of all manufactured structures. ORS 801.333.

**Market value.** See real market value.

**Measure 5.** Constitutional tax rate limitations passed by voters in November 1990, which can be found at Article XI, Section 11b of the Oregon Constitution. Measure 5 limited school taxes to \$15 per \$1,000 of assessed value and non-school taxes to \$10 per \$1,000 of assessed value starting in 1991–92. The school limit fell by \$2.50 per \$1,000 each year until it reached \$5 per \$1,000 in 1995–96. The non-school limit remains at \$10 per \$1,000. Levies to pay bond principal and interest for capital construction projects are outside the limitation. The Measure 5 rate limits still apply under the provisions of Measure 50, passed in 1997, but now apply to real market value.

**Measure 50.** Measure 50 is a legislatively referred measure drafted to correct technical problems with Measure 47, a tax cutting citizens' initiative passed in 1996. For 1997-98, Measure 50 reduced the assessed value of every property to 90 percent of its 1995-96 assessed value. Measure 50 then limited the annual growth in assessed value of existing property to 3 percent. In addition, Measure 50 led to the replacement of most levies with permanent tax rates.

**Metropolitan Statistical Area (MSA).** Areas that have been designated by the U.S. Office of Management and Budget as metropolitan. An MSA has at least one urban area of 50,000 people or more, plus adjacent territory that has a high degree of economic and social integration with the nucleus. Oregon has the following MSAs:

- **Bend MSA:** Deschutes County.
- **Corvallis MSA:** Benton County.

- **Eugene-Springfield MSA:** Lane County.
- **Medford MSA:** Jackson County.
- **Portland-Vancouver-Beaverton MSA:** Clackamas, Columbia, Multnomah, Washington, and Yamhill counties. Clark County and Skamania counties in Washington are also part of this MSA, but they are not included in information reported in this book.
- **Salem MSA:** Marion and Polk counties.

**Mobile homes.** See manufactured structures.

**Net assessed value.** Value used to calculate district tax rates for dollar levies. It is total assessed value plus nonprofit housing value and state fish and wildlife value minus urban renewal excess value used.

**Net tax for collection.** Total tax for collection minus total credits. (See Total credits for description.)

**Nonprofit housing value.** Total assessed value of property removed from the roll for nonprofit housing purposes. This property consists of land and improvements owned by nonprofit corporations to provide permanent housing, recreational and social facilities, and care to elderly persons. Under ORS 307.244, qualifying property receives a funded exemption from the property tax, but the county receives an equivalent payment from the state.

**Operating taxes.** Taxes from the permanent, local option, and gap bond rates that are used to fund the general operating budgets of the taxing districts.

**Permanent tax rates.** Permanent taxing rate for each taxing district, expressed in dollars per \$1,000 of assessed value. This rate is the maximum rate a district may use without approval by voters; districts may use any rate below this maximum.

**Personal property value.** Total assessed value of personal property, including machinery, equipment, and office furniture. In 2008-09, personal property accounts of less than \$14,500 in

value, excluding personal property manufactured structures, were not required to pay property tax and were not included in assessed value. The limit is indexed for inflation.

**Plan area.** See urban renewal plan area.

**Public exemptions.** Property owned by federal, state, or local governments (including counties, cities and towns, and school districts) is generally exempt from property taxation. This includes all public or corporate property used or intended for use for corporate purposes of local governments and all public or municipal corporations in the state. When such property is leased to a private party, the leased portion generally becomes taxable.

**Public utility.** Property described in ORS 308.515. See centrally assessed property.

**Rate based property tax system.** Tax system in which tax rates are set by law or by voters, and levies are calculated as rates times assessed value. Under Measure 50, Oregon's tax system is predominately a rate-based system.

**Real market value.** Real market value of all property, real and personal, is the amount in cash that could reasonably be expected to be paid by an informed buyer to an informed seller, each acting without compulsion in an arm's length transaction occurring as of the assessment date for the tax year.

**Real property value.** Total assessed value of real property, including land, buildings, structures, and improvements. The following property classes are included within real property:

- **Commercial land.** Unimproved property that has commercial use as its highest and best use.
- **Commercial property.** Improved property that has commercial use as its highest and best use.
- **Farm and range property.** Land or land and buildings with a highest and best use of the production of agricultural crops, feeding and

management of livestock, dairying, any other agricultural or horticultural use, or any combination thereof.

- **Farm and range zoned property.** Land or land and buildings located within an exclusive farm-use zone assessed as farm-use land.
- **Farm and range unzoned property.** Land or land and buildings assessed as unzoned farmland.
- **Forestland and forest property.** Consists of land with a highest and best use of growing and harvesting trees of a marketable species, and land that has been designated as forestland.
- **Industrial land.** Unimproved property that has industrial use as its highest and best use.
- **Industrial property.** Improved property that is a single plant or a complex of properties engaged in manufacturing or processing a product. The Department of Revenue or County may be responsible for appraisal of industrial property.
- **Multiple housing land.** Unimproved property that has multiple housing use (five living units or more) as its highest and best use.
- **Multiple housing property.** Improved property that has multiple housing use (five living units or more) as its highest and best use.
- **Recreation land.** Unimproved property that has recreational use as its highest and best use.
- **Recreational property.** Improved property that provides recreational opportunities as its highest and best use.
- **Residential land.** Unimproved property that has residential use as its highest and best use.
- **Residential property.** Improved property that has residential use as its highest and best use.
- **Tract land.** Unimproved acreage with a highest and best use other than farm, range, or timber production.

- **Tract property.** Improved acreage with a highest and best use other than farm, range, or timber production.

**Roll.** See Assessment roll.

**Social welfare exemptions.** Assessed value of properties owned by private organizations and used for educational, religious, or developmental purposes is exempt from property taxes. The qualifying organizations include:

- **Fraternal organizations** (ORS 307.136).
- **Literary and charitable organizations** (ORS 307.130).
- **Religious organizations** (ORS 307.140).
- **Burial grounds** (ORS 307.150).
- **All other social welfare.** Includes private schools and day care facilities, public libraries privately owned, senior centers privately owned, etc.

**Special levy.** See urban renewal special levy.

**Specially assessed property.** Property that is assessed at less than its full value. See farm use special assessment and forestland special assessment.

**Supervisory orders.** Orders to the counties from the Department of Revenue to correct the values of centrally assessed utility accounts on the tax rolls. These orders are related to corrections in valuations, not appeals.

**Taxable value.** See assessed value.

**Taxes added to rolls.** Additional taxes generated when a final order is entered in an appeal, other omitted property is included, or error corrections are made.

**Tax extended.** Amount of tax *before* the Measure 5 rate limits are applied. If, for an individual property, taxes exceed Measure 5 limits, then the taxes for that property are reduced to the limits.

**Tax imposed.** Taxes to be paid by taxpayers *after* the Measure 5 rate limits have been applied. For

individual properties, the tax imposed always will be less than or equal to the tax extended.

**Tax increment financing.** A financial tool designed to tax the increases in property value that occur over time in a specific geographic area. Given the frozen base value of the property at the time such a plan area is established, any growth in value (“excess value”) is taxed to raise revenue.

**Tax increment revenue.** Revenue raised from taxing the growth in value (“excess value” or “increment”) of properties in a given geographic area.

**Taxing district.** The portion of a district that exists within a county.

**Tax limit category.** Under the 1990 Measure 5 constitutional property tax limitation, taxes are divided into three categories: 1) inside the general government limit, 2) inside the education limit, and 3) outside the limit. All taxes, other than bond levies for capital construction, that are used for non-school purposes fall inside the general government limit of \$10 per \$1,000 of assessed value. All taxes, other than bond levies, that are used for education purposes fall inside the education limit of \$5 per \$1,000 of assessed value. All bond levies used for capital construction fall outside the limit. Of the current types of levies, permanent rate, local option, gap bond, and pension levy taxes are subject to the limitations.

**Total amount of property tax certified.** Amount of taxes charged by the tax collector as certified by the assessor and authorized by the county clerk. The total includes taxes on real property, personal property, manufactured structures, and public utilities. The amount reported by counties generally includes taxes relating to special assessments and in-lieu payments for fish and wildlife property and nonprofit housing property.

**Total assessed value.** Sum of assessed values of all taxable properties on the roll.

**Total credits.** Includes discount allowed for prompt payments, personal property taxes

canceled by order of county clerk, real property foreclosures, and other corrections or cancellations.

**Total levy.** Total levy submitted by the district, including the local option levy and the levy for bonded indebtedness.

**Total taxes collected.** Taxes collected by the tax collector during the fiscal year ending June 30. Tax collections are reported separately from interest and penalty collections.

**Unallocated utilities.** Small, private railcar companies that pay property taxes to the state. These taxes are distributed by the state to county governments.

**Urban renewal.** A state-sanctioned program designed to help communities improve and redevelop areas that are physically deteriorated, unsafe, or poorly planned.

**Urban renewal agency.** Entity responsible for administering urban renewal programs. Urban renewal agencies can be organized by city governments or county governments. They oversee activities in urban renewal plan areas. An urban renewal agency can administer multiple plan areas.

**Urban renewal excess value.** Total assessed value of property in urban renewal plan areas in excess of the base assessed values when the plan areas were established. This is also called the “increment.”

**Urban renewal option.** Funding option that the urban renewal plan uses. Only “existing” plan areas could choose option 1, 2, or 3 (see existing urban renewal plan). Plan areas that are not “existing” can raise revenue as described under “Other” below.

- **Option 1** plan areas receive full division of tax revenue from all levies except local option and bond levies passed after October 6, 2001. A special levy on all taxable property in the municipality may be used to reach the plan area’s maximum revenue authority.

- **Option 2** plan areas cannot receive division of tax revenue but a special levy may be used to raise revenue up to the plan area’s maximum revenue authority from properties in the municipality.
- **Option 3** plan areas had their revenue from division of tax limited when the option was selected. These plan areas receive division of tax revenue up to their limit and may impose a special levy on all taxable property in the municipality up to their maximum revenue authority.
- **Other** plan areas that did not select an option, but were *adopted before* October 6, 2001, raise division of tax revenue from all levies, but cannot use a special levy. Other plans that were *adopted after* October 6, 2001, must exclude local option and bond levies passed after October 6, 2001, when calculating division of tax revenue; they also cannot use a special levy.

**Urban renewal plan area.** Geographic area in which urban renewal activity takes place. It is the “excess” value in urban renewal plan areas that determines the amount of tax to raise for urban renewal agencies.

**Urban renewal shared value.** The assessed value of property that is both 1) within the district that covers part of a plan area, and 2) within the boundaries of the urban renewal agency. It also includes portions of a district that are within a plan area but outside the area of the urban renewal agency. Property owners within the shared value area may have part of their taxes allocated for urban renewal rather than for their tax districts.

**Urban renewal special levy.** Levy imposed by an urban renewal agency if the amount of revenue raised from excess value is below its revenue-raising authority.
