Mission

To promote excellence in public safety by delivering quality training and developing and upholding professional standards.

Vision

DPSST will deliver programs and services through an agency that is committed to its values, collaborates internally and externally and is responsive to its constituents. The agency will ensure public safety constituents are highly-skilled professionals who demonstrate excellence, embody the diversity of the state, and inspire public trust, as they protect the lives, assets and livability of Oregon’s citizens and visitors.
Executive Summary

The Oregon Department of Public Safety Standards and Training (DPSST) is entrusted to provide quality training as a service to its public safety constituency and the communities they serve. The 2021 Basic Police Program overview is the culmination of a multi-year collaborative effort to align basic police training with evidence-based practices, both in content and delivery.

This document provides an overview of the 2021 Oregon Basic Police Training Academy. The following pages include a description of how the program was developed, program evaluation results, and course information. Course information includes high-level course content for each course, or in some cases series of courses. The content includes the course (or series) goal, learning outcomes, measureable behavior metrics, and a high-level outline of course content.

This high-level document is not reflective of all content students will receive during their 640 hours of training. It is simply meant to provide an overview of the full 16-week program. The complete student material is available on the DPSST website or by request.

Cornerstone to the program are recommendations from the President’s Task Force on 21st Century Policing Report (2015) and the subsequent Evidence-Assessment of the Recommendations of the President’s Task Force on 21st Century Policing (2016). Additionally, the program is grounded in empirical research on officer behaviors during encounters with the public. These behaviors (metrics) are objective measures used to assess officer performance and affect the probability of desirable encounter outcomes.
Program Summary
The Basic Police Program consists of 16-weeks (640 hours) of academic and skills training for new officers. The goal of the academy is to prepare new officers for the next step of their professional development, field training.

After more than a decade in its traditional form, the Basic Police Academy began transitioning to a research-informed program in 2017. The complete revision has resulted in significant changes to program structure, course topics, content, application, assessment, and delivery methodologies.

Topics and Content
Course topics and content are informed by academic research where possible. However, many topics related to effective policing and police training are not well supported by research. In the absence of empirical research, topics and content are informed by recommendations from trusted professional sources such as the International Association of Chiefs of Police, the Police Executive Research Forum, the American Society of Evidence-Based Policing, and Crisis Intervention Team International among others. Subject matter experts from public safety, academia, mental health, the legal community, community partners, and community members contributed to course development.

Course Structure and Delivery
The program is designed based on decades of research on learning, performance improvement, cognitive psychology, and training transfer among other well-established concepts. Foundational theories include learning processing, cognitive load, adult learning, and active learning among others.

Aligning with research on effective learning practices, the program structure includes short, frequent sessions on multiple topics rather than long blocks of training on a single topic. Connections between content is intentionally designed into the curricula and course content builds upon itself as the program progresses.
Training delivery methodologies includes students actively engaging in learning activities rather being passive recipients of information. Opportunities for practice and feedback are built in throughout the program in the form of activities, role plays, skill drills, fragment drills, and scenario training. Students are guided through a process of self-reflection and self-assessment to further develop their emotional intelligence, critical thinking, and problem-solving abilities.

**Student Assessment**

Students complete a variety of knowledge and skill assessments throughout the program. In addition to in-class discussions, activities, and projects, students must pass a series of written quizzes and exams. Students participate in skill assessments in firearms, emergency vehicle operations, and defensive tactics among others. Students participate in a series of video and live scenarios where they receive an evaluation and feedback.

Successful completion of academy training requires students to meet a combination of standards set by Oregon Administrative Rule, Oregon Revised Statutes, legislative mandates, and DPSST Board approval.

Program Evaluation

The Basic Police program has been undergoing a formal external evaluation since the implementation of Phase 1. Under a contract with Washington State University, evaluators began collecting baseline data on the Basic Police program in May 2018. The evaluators have completed an evaluation of Phase 1. The Phase 2 evaluation report is pending. Once implemented, Phase 3 will receive a formal evaluation.

The data collection occurs during Week 16 of the Basic Program and consists of a series of video simulations. Each student completes six video simulations, based on the following circumstances:

1. Domestic disturbance
2. Vehicle stop
3. Suspicious person call
4. Investigation of suspicious circumstances
5. Disturbance of the peace
6. Welfare check

Three of the scenarios are tactical social interactions and can end either as a positive, neutral, or lethal encounter depending on the actions of the recruit. Three of the scenarios are Use of Force which are predetermined to end in one or two deadly encounters which are allocated at random.

Student performance is assessed based on a series of research-based metrics. These metrics have been infused throughout their 16 weeks of training. The evaluation intent is to assess whether students are demonstrating use of the metrics at the end of their training.

The evaluation finds that of 187 possible metrics used to assess student performance during their six scenarios, 39 showed significant positive change from baseline to Phase 1. Four metrics showed negative change during this same period.
The greatest positive change (54% increase) was in students ability to explain the encounter, including developing a shared understanding for the reason for the encounter, and the expectations for the community member as displayed in Table 1. This is a fundamental tenant of procedural justice.

Another positive change (41% increase) included an increase in students showing a more determined mindset in dealing with the nature of the call for service in a more direct way as displayed in Table 2.

A third positive change (34% increase) was an increase in the students’ ability to use communication skills to defuse or de-escalate a potentially violent situation as displayed in Table 3.

Although only 43 of the 187 metrics have shown a significant change from the baseline data, over half of the metrics (55%) are demonstrated frequently. Eighty-eight of the metrics are demonstrated 90% or more of the time. Another fifteen metrics are demonstrated more than 80% of the time.

Four metrics showed negative change, or a decline in student performance from the baseline to Phase 1 data. These include:

1. Picking up on tone of voice of person in crisis.
2. Recognizing weapons of opportunity in the environment
3. Calling for backup when appropriate
4. Establishing common ground

The evaluation also examines students’ ability to recognize when a scenario is heading in a negative direction and whether they take steps to repair the encounter. The evaluation shows a greater percentage of scenarios moving in a positive direction as demonstrated in Table 4.

As displayed in Table 5, for scenarios that turned negative, a higher percentage of encounters were repaired by post Phase 1 cohorts compared to those at baseline.

A final outcome identified in the evaluation is fewer scenarios are ending in deadly force as demonstrated in Table 6.

Overall, the evaluation indicates students are applying the concepts of communication, emotional intelligence, legitimacy, procedural justice, and de-escalation that have been integrated throughout the Basic Police program curriculum. Additionally, the evaluation informs the organization where attention is needed.

Once Phase 3 is implemented, data collection will begin and a final evaluation will be conducted.
Program Content
Affidavits and Search Warrants

Instructional Goal:
This course is designed to introduce a new officer to the use, limitations, and processes relating to affidavits and search warrants.

Learning Outcomes:
Upon completion of instruction, students will be able to:
1. Identify when a search warrant is required in a given situation.
2. Describe probable cause in a given situation.
3. Describe the scope of a search in a given situation.

Content Outline:
- Constitutional Foundations
- Subjects of a Search Warrant
- Affidavits
- Drafting a Warrant
- Executing a Warrant

Behavior Metrics:
- Law
  - Acting based on knowledge about the legal issues surrounding the encounter
  - Does what actions are legal
  - Knowing legal issue/case law
Behavioral Health: Awareness

Instructional Goal:
This series is designed to:

1. Develop a new officer's understanding of behaviors commonly associated with mental illness, crisis, addiction, trauma, and developmental disabilities.
2. Provide a new officer with opportunities to practice conducting safe, lawful, and effective interactions involving persons experiencing a possible behavioral health related crisis.

Learning Outcomes:
Upon completion of instruction, students will be able to:

1. Articulate how stigma impacts mental illness and addiction.
2. Articulate behaviors commonly associated with mental illness, addictions, trauma and developmental disabilities.
3. Identify potential barriers to communication with a person experiencing a mental health crisis.

Content Outline:
- Stigma
- Myths and Facts: Mental Illness, Addictions, Developmental Disabilities
- Impact and Common Characteristics of Mental Health Disorders
- Major Mental Illnesses
- Suicide
- Trauma-Informed Approach
- Substance Dependence Disorders
- Disabilities
- LEDS
- Crisis Intervention
Behavior Metrics:

- Bias
  - Managing personal biases related the person in crisis that influence decision making

- Communication
  - Asses the civilian's understanding of the officer
  - Being able to actively listen to the person in crisis during the encounter
  - Being aware of his or her own non-verbal cues
  - Being aware of the words he or she uses and how they influence the person in crisis
  - Gives relevant and meaningful commands
  - Introducing him/herself to the civilian
  - Maintains control of the encounter until it is resolved
  - Making sure he/she understands what the civilian is communicating
  - Picking up on tone of voice of the person in crisis
  - Providing clear instructions
  - Reading non-verbal cues of the person in crisis
  - Recognizing the person in crisis’s ability to communicate with the officer
  - Recognizing the person in crisis’s ability to follow directions

- Critical Thinking
  - Thinks outside the standard set of tactics that he/she has been taught to use

- Emotional Intelligence/Self-Awareness
  - Accurately assesses his/her knowledge and skills
  - Being able to see things from the person in crisis’s point of view
  - Correctly estimates his/her ability to read a situation
  - Displays appropriate interpersonal communication
  - Does not negatively react to a perceived challenge to their authority
  - Effectively managed his/her frustration during a prolonged encounter
  - Emotional control contributes to his/her command presence
  - Maintains a professional demeanor
Maintains appropriate command presence
Maintains control over his/her emotions
Not taking things personally (e.g. verbal abuse)
Recognizing what emotional stage the person in crisis is in (e.g. fearful, enraged, anxious)
Shows empathy
Using appropriate techniques based on what emotional stage the person in crisis is in (e.g. fearful, enraged, anxious)
Using the individual skills or characteristics of officers involved (e.g. previous experience, cultural factors)
Using the individual skills or characteristics of other responders involved (e.g. previous experience, cultural factors)

Information
Confirming and verifying call information
Giving the person in crisis information about resources that can help him or her
Knowing where to get accurate information on the person in crisis
Seeking access to previous information about the person in crisis (personal history)
Seeking access to previous information about the person in crisis (personal history)
Obtaining critical information from family members about the person in crisis

Legitimacy and Procedural Justice
Demonstrating patience with the person in crisis
Explaining his or her actions to the person in crisis
Maintaining a respect for basic human rights
Taking action to improve civilian's conditions
Taking time throughout the entire process (pre-during-and post-encounter)
Time spent before getting to the purpose of the encounter not rushing to the purpose of the encounter/getting directly to the point
• Treating mentally ill or disabled civilians with dignity and respect
• Willingness to spend time with the person in crisis

• Mental Health
  o Accurately describing the behaviors of the person in crisis to mental health professionals
  o Appropriately using mental health resources (e.g. calling mental health professionals, homeless shelters)
  o Determining the person in crisis’s level of risk due to his or her inability to meet basic health and safety needs
  o Knowing key mental health terms (e.g. legal acronyms)
  o Knowing about available mental health resources (e.g. mental health professional, homeless shelters)
  o Recognize/identify mental health issues
  o Recognizing whether the person in crisis has symptoms of a medical condition and not mental illness

• Situational Awareness
  o Accurately assesses subject competence
  o Calling for backup when appropriate
  o Is flexible and changes tactics when necessary
  o Prioritizing actions during an encounter
  o Recognizing hazards in the environment (e.g. trip hazards, bio-hazards)
  o Recognizing urgent medical needs of the person in crisis
  o Recognizing weapons of opportunity in the environment (e.g. rocks, lamp shades)
  o When possible, assesses the situation fully before acting

• Tactical Assessment
  o Accurately assesses subject compliance
  o Adapting tactics based on the key indicators from the person in crisis
  o Adapts his/her tactics creatively when an encounter changes into something unusual or out of the ordinary
- Adjusts to the unexpected
- Aware of proximity to the subject
- Aware of the space around him/her and the position of nearby objects
- Aware of what is going on in the periphery of his/her hearing
- Aware of what is going on in the periphery of his/her vision
- Changed positions when appropriate
- Changing tactics when original tactics are not working
- Differentiates what is relevant from what is irrelevant in the encounter
- Effectively controlling the person in crisis’s movement
- Has appropriate tactical decision making skills
- Maintaining a position of tactical advantage

- Threat Response
  - Adapting based on changing level of threat
  - Continually assessing the level of threat the person in crisis poses
  - Correctly identifies threats
  - Correctly responds to a threat
  - Optimizes the distance between him or herself and the identified threat
Behavioral Health: De-escalation

Instructional Goal:
This course is designed to:

1. Develop a new officer’s understanding of mental health crises and crisis de-escalation techniques.
2. Provide a new officer with opportunities to practice conducting safe, lawful, and effective interactions involving persons experiencing a possible behavioral health related crisis.

Learning Outcomes:
Upon completion of instruction, students will be able to:

1. Identify characteristics of a behavioral health crisis.
2. Describe considerations when responding to a behavioral health crisis.
3. Demonstrate an ability to safely interact with someone in a behavioral health crisis.
4. Practice de-escalation techniques that can be used in a crisis.
5. Identify options for resolving behavioral health crisis situations.

Content Outline:

- Crisis and the Crisis Cycle
- Crisis Communication
- Crisis Calls
  - Prior to Arriving
  - Arriving
  - Engaging the Person in Crisis
  - Diffusing
  - Stabilizing the Call
  - Referral/Resource Information

Behavioral Health: Legal Considerations

**Instructional Goal:**
This course is designed to:

1. Introduce a new officer to the legal authority associated with behavioral health interactions.
2. Provide a new officer with opportunities to practice conducting safe, lawful, and effective interactions involving persons experiencing a possible behavioral health related crisis.

**Learning Outcomes:**
Upon completion of instruction, students will be able to:

1. Describe the officer’s authority under ORS 426.228 (custody of persons in need of emergency care and treatment).
2. Articulate significant case law principles impacting interactions between law enforcement and mentally ill persons.
3. Understand the significance of the Americans with Disabilities Act, as it relates to law enforcement interactions with mentally ill persons.

**Content Outline:**
- Peace Officer Custody
- Use of Force and Persons with Mental Illness
- Americans with Disabilities Act
Behavior Metrics:

- Law
  - Acting based on knowledge about the legal issues surrounding the encounter
  - Does what actions are legal
  - Knowing legal issue/case law

- Mental Health
  - Appropriately using mental health resources (e.g. calling mental health professionals, homeless shelters)

  - Recognizing whether the person in crisis has symptoms of a medical condition and not mental illness

- Situational Awareness
  - Recognizing urgent medical needs of the person in crisis
Behavioral Health: Veterans Awareness

Instructional Goal:
This course is designed to:

1. Develop a new officer's ability to recognize actions and behaviors, which could indicate that an individual is a Veteran and may be experiencing a mental health crisis and effectively de-escalate the individual from the crisis state.
2. Provide a new officer with opportunities to practice conducting safe, lawful, and effective interactions involving persons experiencing a possible behavioral health related crisis.

Learning Outcomes:
Upon completion of instruction, students will be able to:

2. Describe Readjustment Challenges a Veteran may experience when leaving the military.
