Note to Reader

On June 3, 2014, the Wildland Task Force convened at the Department of Public Safety Standards and Training (DPSST) at the direction of the Fire Policy Committee to discuss challenges the Oregon fire service experiences with the current standard. It was the intent of the Task Force to find viable solutions that would ensure the Oregon fire service was provided adequate wildland training and experience to perform in the Wildland environment. The Task Force was well-represented from all areas of the Oregon fire service and the members had adequate time to prepare for the evaluation of the current standard.

The Task Force reviewed current standards for certification and determined adopting into Oregon Administrative Rule (OAR) the National Wildfire Coordinating Group (NWCG) National Incident Management System, Wildland Fire Qualification System Guide, PMS 310-1, Edition October 2013 as the standard for training requirements. The Task Force did not vote to adopt the entire standard; only the Operations Positions from Firefighter Type 2 up to Division/Group Supervisor.

The Department of Public Safety Standards and Training (DPSST) Fire Certification Program and the Task Force collaborated to create this guide to demonstrate the changes and how it applies to certifications standards.

The standard has experienced several changes to align with PMS 310-1. The standard now is referred to as **“Wildland Fire Operations Positions”** instead of *“Wildland Interface.”* The following Operational positions are as follows (this follows PMS 310-1).

Please refer to <http://www.nwcg.gov/pms/docs/pms310-1.pdf> for additional information.

Frequently Asked Questions:

Q: *Will DPSST reprint certifications to reflect the new standards of certification?*

A: **No.** Historically, DPSST has not reprinted certificates when a change in standard has occurred. However, the Task Force created a Wildland Certification Equivalency Chart (page 14 of this guide) that illustrates a crosswalk for fire service professionals as a reference.

Q: *Is the Wildland Interface Structural Group Supervisor level of certification recognized by NWCG?*

A: **No.** If the state adopts PMS 310-1, Wildland Interface Structural Group Supervisor will no longer exist. DPSST identified 15 people who currently hold that level of certification. Of that number, eight are also certified at the NWCG Division/Group Supervisor, thus leaving seven fire service professionals at that level. The seven fire service professionals that do not have NWCG Division/Group Supervisor certification have three options to meet the experience requirement for NWCG Division/Group Supervisor (See page 54 of the PMS 310-1 document <http://www.nwcg.gov/pms/docs/pms310-1.pdf>).

Q: **What will happen to those seven certified fire service professionals?**

A: The recommendation of the Task Force is to allow the standard to continue through the end of this Maintenance Re-Certification cycle (January 1, 2018) and then it will expire. The certifications will not be recalled; however they will simply become lapsed. If the seven affected fire service professionals would like to apply for the NWCG Division/Group Supervisor, they will need to apply using the new application and submit it to DPSST for processing.

Q: **Will there be a “Historical Recognition” period?**

A: **No.** This was discussed at great length by the Task Force and DPSST. It was determined DPSST would not offer this as a solution due to the pre-requisite and task book requirements. The Task Force voiced concern over violating NWCG requirements related to achieving certification and retaining a professional relationship with our NWCG colleagues. Lastly, concern was placed on individuals receiving a level of certification without meeting the minimum NWCG training requirements for qualification.

Q: **How will this appear on my Maintenance Re-Certification Forms/SnapShot?**

A: Maintenance Re-Certification Forms/SnapShot records will continue to show certifications awarded at that time. The local jurisdiction and DPSST will follow the Wildland Certification Equivalency Chart to determine the fire service professional’s equivalent certification(s).

(69) “NWCG Firefighter Type 2 (FFT2)” means a person who is the basic resource used in the control and extinguishment of wildland fires and works either as an individual or as a member of a crew under the supervision of a higher qualified individual.

(70) “NWCG Firefighter Type 1 (FFT1)” means a person who is a working leader of a small group (usually not more than seven members) and is responsible for keeping assigned personnel fully employed on assigned jobs. Normally this position is supervised by a Single Resource Crew Boss but may be assigned independently on occasion.

(71) “NWCG Single Resource Boss (CRWB, ENGB, FELB, FIRB, HEQB or HMGB)” means a person who is responsible for supervising and directing a fire suppression module, such as a hand crew, engines, one or more fallers, a firing team, heavy equipment or helicopters.

(72) “NWCG Task Force Leader (TFLD) / NWCG Strike Team Leader Engine (STEN)” means a person who is the ICS position responsible for supervising a task force of resources. The NWCG Strike Team Leader Engine (STEN) is the ICS position responsible for the direct supervision of a strike team of engines. Both positions report to a Division/Group Supervisor or Operations Section Chief.
