Register here: <https://www.eventbrite.com/o/dpsst-fire-program-12337899945>

Course Descriptions

•**F0637 - Wildland Urban Interface: Fire-Adapted Communities—Introduction and Leadership, Course I:** This 2-day course introduces students to the national wildland urban interface (WUI) fire problem and motivates them to initiate action to address the problem within their local community.

•**F0722 – Health and Safety Program Manager:** This 2-day course will provide fire and emergency medical services department personnel and other related emergency responders with the aptitudes and abilities necessary to manage the duties and responsibilities of the Health and Safety Program Manager (HSPM) within their respective organizations.

•**Firefighter Survival and RIT:** This is a 2 day, physically challenging hands-on class to learn Firefighter Survival and Rapid Intervention Team (RIT) techniques. The skills taught in this class are driven from lessons learned from firefighter fatalities and injuries. This class requires full structure Personal Protection Equipment (PPE) to include you bringing your agency Self-Contained Breathing Apparatus (SCBA) and a spare SCBA cylinder. We will cover the following skills over two days.

Course Content:

- SCBA knowledge and air management
- Low profile SCBA techniques
- CPR on downed firefighters
- Lost and disoriented firefighter
- Firefighter through the floor rescue
- Downed firefighter assessment
- Working as a RIT member and RIT skills

Course Descriptions

•**Vehicle Extrication**: Due to limited class space, if you have previously attended this training, you are not eligible to attend it again at Spring Fire School. Limited seats available per region. This course begins with a two-hour review of overall goals and objectives of the program. Once classroom training is completed, firefighters will conduct practical application. Curriculum is in alignment with NFPA 1006. Practical evolutions consist of six different stations to include Incident Command; Airbags; Buttress Stabilization; Hydraulic Tool Use; Pneumatic, Electrical and Hand Tools Use; and Initial Stabilization. The 2nd day of training will include scenario-based evolutions. Full PPE required (no SCBA needed). Please contact your Regional Coordinator to register!
