5:55 p.m.  Q + A (submit your questions in the chat)
6:10 p.m.  Hearing Your Feedback
7:30 p.m.  Forum concludes

Guidelines for Participating in the Public Forums

*What to Expect When Joining the Forum*
Attendee microphones and cameras will be off during the welcome and DSL and OSU presentations. If you need assistance during the forum, you’ll be able to contact the meeting moderator via the meeting chat.

*Asking Questions*
There will be time to ask questions after the DSL and OSU presentations. Submit questions via the meeting chat. The moderator will ask DSL and OSU representatives to answer the questions during the Q+A time. Questions will be asked in the order submitted. Similar questions may be combined.

*Hearing Your Feedback*
Most of the forum time is dedicated to hearing from you! After the Q+A, the facilitator will ask attendees to use the “raise hand” feature to indicate they want to speak. If you are calling in, push *9 to raise your hand.

Updated 10.23.20
The facilitator will call on one person to speak, and also note who the next two people to speak will be. A notification inviting you to unmute your microphone will pop up when it’s your turn.

**Feedback Guidelines**

If you are interested in providing feedback during a forum, please note:

- Each person will have approximately two minutes to provide feedback – please plan your comments accordingly. Respecting the time limit will allow us to hear from as many people as possible. We will help you keep track of your time.
- Feedback will be recorded to help DSL capture all feedback accurately.
- Speaking during a forum is just one of several ways to provide feedback on the potential research forest. If you have extensive feedback, please consider submitting your feedback in writing.
- There may not be time to hear from everyone. If you aren’t able to speak, please consider providing feedback during a drop-in event or submitting written feedback, either during the meeting via chat, via [online feedback form](#), or by email to ali.r.hansen@state.or.us
