

Unemployment Insurance Trust Fund Forecast Summary

March 2025

Executive summary

This report summarizes the status and most recent forecast of Oregon's Unemployment Insurance (UI) Trust Fund through 2029. This report is based on data from the Oregon Employment Department, U.S. Department of Labor, and Oregon Office of Economic Analysis. This report is released four times per year — March, June, September, and December. The actual data in each report is through the previous quarter, except for employment data which lags an additional quarter. This report includes actual UI data through the fourth quarter of 2024 and actual employment data through the third quarter of 2024. This report does not include any changes in economic conditions or new legislation after March 1, 2025.

State benefit payments from the UI Trust Fund were approximately \$814 million in 2024 and are forecast to be \$824 million in 2025 and \$924 million in 2026. In December, the forecast was \$773 million in 2024, \$806 million in 2025 and \$891 million in 2026. The increase in forecast benefit payments is driven by increases in the number of forecast weekly claim payments.

Employer contributions to the UI Trust Fund were approximately \$1.1 billion in 2023 and \$1.2 billion in 2024 and are forecast to be \$1.3 billion in 2025. The December forecast was also for \$1.3 billion in 2025.

The UI Trust Fund is projected to remain in good financial standing. The UI Trust Fund balance was \$6.4 billion on December 31, 2024. Through 2027, we expect the fund balance to be relatively unchanged from our December forecast in the near term, but lower by about 0.5 percent over the long term due to a higher number of forecast claim payments.

UI tax schedule III is in effect in 2025. We forecast that schedule III will be in effect through the end of 2028.

Contents

The remainder of this report covers the following:

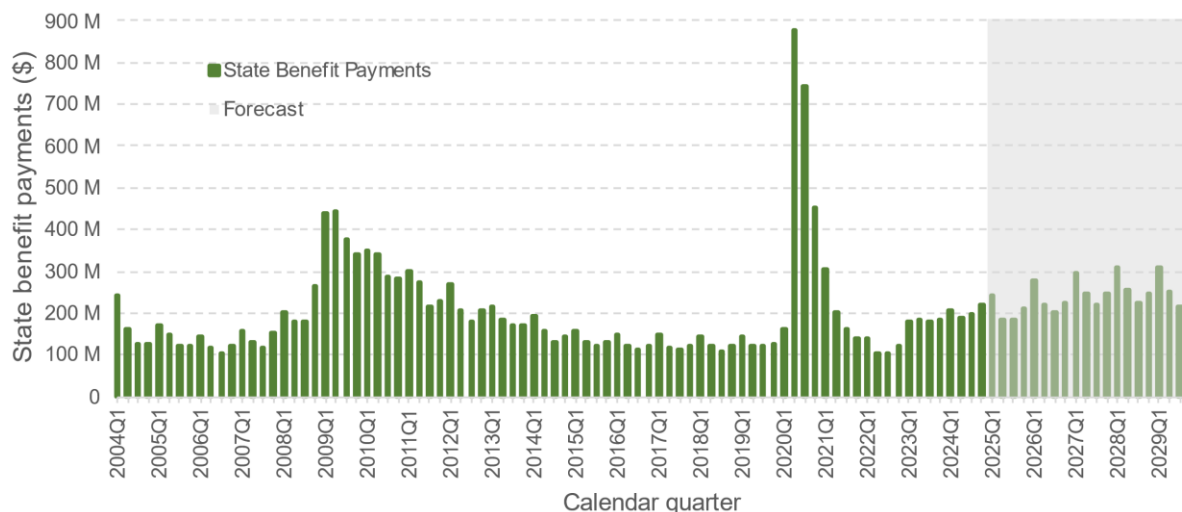

- State benefit payments and employer contributions forecast through 2029
- Comparison of the last two UI Trust Fund balance forecasts
- UI Tax schedule forecast through 2029 and long-term average UI tax rates
- *Appendix 1:* Economic data for the last two forecasts
- *Appendix 2:* Definitions of economic data
- *Appendix 3:* Data for figures 1-4 from the last two forecasts

State benefit payments from the UI Trust Fund

State benefit payments from the UI Trust Fund were approximately \$814 million in 2024 and are forecast to be \$824 million in 2025 and \$924 million in 2026. The December forecast was and \$806 million in 2025 and \$891 million in 2026. The changes to the state benefit payments forecast in 2025 and 2026 are driven by increase in the number of expected weekly benefit payments.

Figure 1 shows actual and forecast state benefit payments from the UI Trust Fund from 2004 to 2029. The UI workload forecast is based on projected economic conditions, historic claims data, and workload forecasts.

Figure 1. State benefit payments from the UI Trust Fund, Oregon, 2004-29

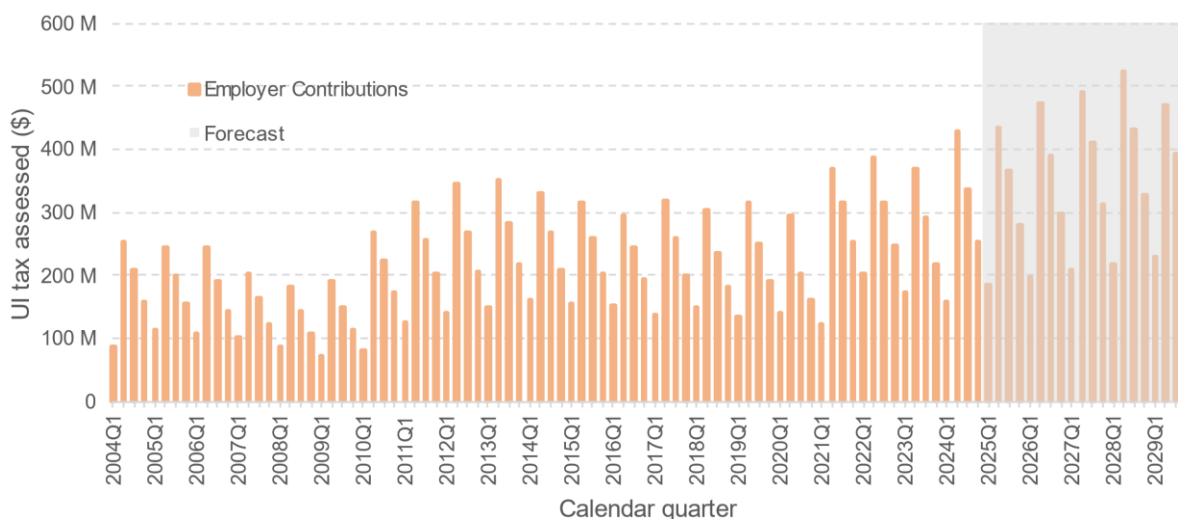

Source: Oregon Employment Department / ETA 5159 / OED Workload Report / Office of Economic Analysis

Employer contributions to the UI Trust Fund

Employer contributions to the UI Trust Fund were approximately \$1.1 billion in 2023 and \$1.2 billion in 2024 and are forecast to be \$1.3 billion in 2025 and \$1.4 billion in 2026. The December forecast was essentially the same for 2025, however it was about \$21 million lower for 2026.

Figure 2 shows actual and forecast employer contributions to the UI Trust Fund between 2004 and 2029. Contributions to the UI Trust Fund are based on the UI tax schedule and they exclude contributions for the Supplemental Employment Department Administrative Fund.

Figure 2. Employer contributions to the UI Trust Fund, Oregon, 2004-29

Source: Oregon Employment Department / ETA 2112 / Office of Economic Analysis

UI Trust Fund balance

Figure 3 shows the actual and forecast UI Trust Fund balance between 2004 and 2029 for the last two forecasts. We expect that the balance will increase more quickly in the near term but slow in the later years of the forecast compared to the December 2024 forecast. The balance was \$6.4 billion on December 31, 2024.

Figure 3. UI Trust Fund balance, Oregon, 2004-29

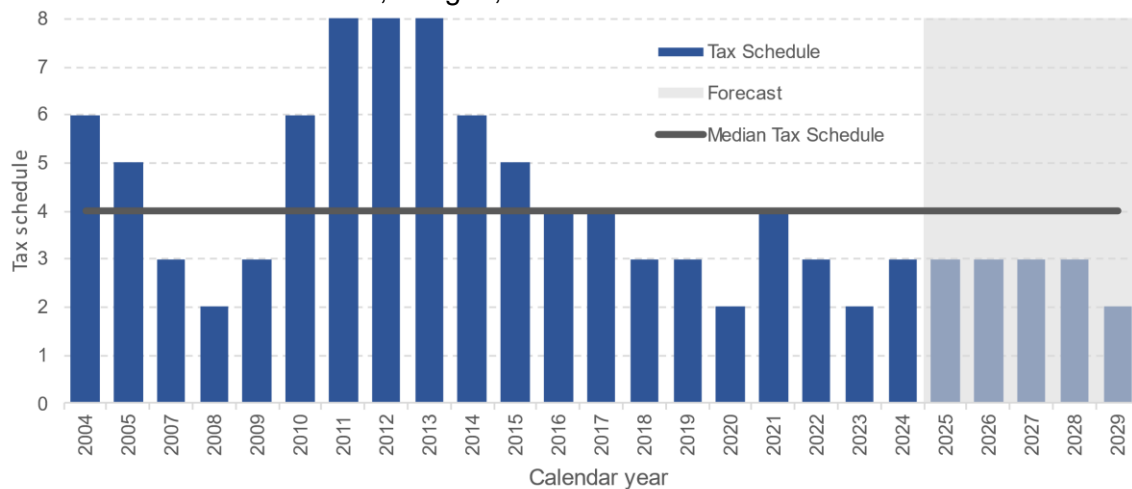

Source: Oregon Employment Department / ETA 2112

The UI Trust fund earns quarterly interest on the balance invested at the U.S. Treasury. This additional fund stream increases the likelihood of a lower statewide UI tax schedule and individual employer tax rates. Since the Trust Fund balance low point of \$767 million in the second quarter of 2010, the UI Trust Fund has earned more than \$1 billion in interest, including \$50 million in 2024Q4.

Statewide tax schedule and individual employer tax rates

Figure 4 shows the actual and forecast statewide UI tax schedule between 2004 and 2029. UI tax schedule III is in effect in 2025 and is expected to remain in effect through 2028. Tax schedule II is currently projected to be in effect for the 2029 tax year.

Figure 4. Statewide UI tax schedule, Oregon, 2004-29

Source: Oregon Employment Department / ETA 5159

Figure 5 illustrates the statewide UI tax schedules and the long-term average tax rates on taxable wages for individual employers. The circles in Figure 5 represent the years that tax schedule was in effect. The percentages above each bar show the long-term average tax rate for that tax schedule. Per ORS 657.462, each tax schedule has several rates that are assigned to employers based on the rate their employees received UI benefits relative to their taxable payroll (benefit ratio). The average tax rate on taxable wages will remain at 1.97 percent in 2025.

Appendix 2: Definitions of economic data

The following are definitions for the economic data reported in table A1:

- **Total nonfarm employment:** A measure of the number of workers in the economy that excludes proprietors, private household employees, unpaid volunteers, farm employees, and the unincorporated self-employed. Nonfarm employment is used in the UI Trust Fund model to forecast covered employment and taxable employment.
- **Wage and salary:** This component of personal income consists of the monetary remuneration of employees. It reflects disbursed wages and salaries, but not necessarily earned, during the quarter. This component is measured before deductions, such as Social Security contributions and union dues. The percentage growth for wage and salary is used in the UI Trust Fund model to forecast state benefit payments, taxable payroll, and the fund adequacy percentage ratio (ORS 657.459).
- **Unemployment rate:** The rate computed by dividing total unemployed by the civilian labor force. The rate is seasonally adjusted, which smooths out the impact of cyclical patterns that occur every year, such as the increase in unemployment due to winter weather and reduced schooling in summer.
- **Consumer Price Index:** A measure of the prices paid by urban consumers in the west region for a market basket of consumer goods and services. This is not used to adjust dollar values for inflation in the forecast; the data are provided for reference.

Appendix 3: Data for figures 1-4

Appendix table A2 reports the data for figures 1-4 from the last two UI Trust Fund forecasts.

Appendix table A2. State benefit payments, employer contributions, UI Trust Fund balance and UI tax schedule forecasts, Oregon, 2003-29.
