

The Oregon Department of Energy and the Clean Energy Transition Institute will be presenting the results for the Energy Wallet, Air Quality Modeling, and Geospatial Analysis for the Oregon Energy Strategy, as well as a preview of the Job Study. This is an opportunity for Oregonians to learn more about how the results the modeling shows could affect Oregonians.

### Online Info Session: Energy Wallet, Air Quality Modeling, and Geospatial Analysis and Preview of Jobs Study

**Date:** April 16, 2025

**Time:** 9 – 10:30 a.m.

Log-in Information is available [on ODOE's website](#)

#### Info Session Objectives:

- Show insights into how household energy costs might change over time
- Review air quality mapping showing potential effects of reduced air pollutants if Oregon's energy and climate goals were achieved
- Provide additional information for ongoing Energy Strategy policy discussions
- Present background and methodology for additional modeling related to jobs and economics

Join us for this informative session to explore how today's energy decisions could shape your future. This is an opportunity for Oregonians to gain a deeper understanding of how different energy pathways may affect household costs and overall well-being. Learn how various scenarios could affect your wallet, air quality, and community, while considering the burdens, barriers and benefits of each approach.

**Your voice matters in shaping a more affordable, equitable, and sustainable energy future for Oregon!**
