330-280-0080. The rule adds a provision to allow a contractor to request reinstatement of a

rebate reservation if a heat pump was installed and passed final inspection prior to the reservation expiring, but the rebate was not claimed prior to the expiration date. **Summary:** Migrating Application Information Requirements from Division 21 to Divisions 22-24. Prior to this rule change, the Council standards used to evaluate applications for a site certificate for an energy facility were split between Division 21, which had the information requirements, and Division 22-24, which is where the description of the standards is. This rulemaking moved the information requirements, so they are now directly adjacent to the standards that the requirements are designed to show compliance with.
