PERMANENT ADMINISTRATIVE ORDER

DOE 2-2021
CHAPTER 330
DEPARTMENT OF ENERGY

FILING CAPTION: Update energy efficiency standard rules to reflect 2021 legislation; update computer and computer monitor standard.

EFFECTIVE DATE: 01/01/2022

AGENCY APPROVED DATE: 11/23/2021

Rules Coordinator

RULES:

AMEND: 330-092-0010

NOTICE FILED DATE: 09/28/2021

RULE SUMMARY: The amendments remove the definition of a database that is no longer referenced in ODOE rules and renumber remaining items.

CHANGES TO RULE:

330-092-0010
Definitions ¶

As used in OAR 330-092-0010 through 330-092-0070:¶

(1) "Bottle-type water dispenser" or "water cooler" means a water dispenser that uses a bottle or reservoir as the source of potable water. This includes freestanding devices that consume energy to cool or heat potable water, including cold only units, hot and cold units, cook and cold units, storage-type units, and on-demand units.¶

(2) "California Rule" means Title 20, Division 2, Chapter 4, Article 4, California Code of Regulations, in effect on January 2019, revised September 2019.¶

(3) "Commercial dishwasher" means a machine designed to clean and sanitize plates, pots, pans, glasses, cups, bowls, utensils, and trays by applying sprays of detergent solution (with or without blasting media granules) and a sanitizing rinse.¶

(4) "Commercial fryer" means an appliance, including a cooking vessel, in which oil is placed to such a depth that the cooking food is essentially supported by displacement of the cooking fluid rather than by the bottom of the vessel. Heat is delivered to the cooking fluid by means of an immersed electric element of band-wrapped vessel (electric fryers) or by heat transfer from gas burners through either the walls of the fryer or through tubes passing through the cooking fluid (gas fryers).¶

(5) "Commercial steam cooker," also known as "compartment steamer," means a device with one or more food-steaming compartments in which the energy in the steam is transferred to the food by direct contact. Models may include countertop models, wall-mounted models, and floor models mounted on a stand, pedestal, or cabinet-style base.¶

(6) "Computers" and "computer monitors" have the meaning as used in California Rule.¶
(7) "Director" means the Director of the Oregon Department of Energy. ¶
(8) "Department" means the Oregon Department of Energy. ¶
(9) "Equipment" means a category of equipment or appliances regulated by ORS 469.229 to 469.261 and described in OAR 330-092-0015, below. ¶
(10) "Electric storage water heater" means a consumer product that uses electricity as the energy source to heat domestic potable water, has a nameplate input rating of twelve kilowatts or less, contains nominally forty gallons but no more than one hundred twenty gallons of rated hot water storage volume, and supplies a maximum hot water delivery temperature less than one hundred eighty degrees Fahrenheit. ¶
(11) "Faucet" and the following related terms have the meaning as used in California Rule: ¶
(a) "Lavatory faucet" ¶
(b) "Lavatory replacement aerator" ¶
(c) "Kitchen faucet" ¶
(d) "Kitchen replacement aerator" ¶
(e) "Public lavatory faucet" ¶
(f) "Flow rate" ¶
(g) "Plumbing fitting" ¶
(h) "Showerhead" ¶
(i) "Water use" ¶
(12) "High color rendering index (CRI) fluorescent lamp" means a fluorescent lamp with a color rendering index of eighty-seven or greater that is not a compact fluorescent lamp. ¶
(13) "Multi-State Compliance System" or M-SCS means the multi-state database program located at www.appliancestandards.org to register and list compliant equipment. ¶
(14) "MAEDbS" means the modernized appliance efficiency database system established pursuant to section 1606(c) of the California Rule and maintained by the California energy commission. ¶
(15) "Portable electric spa" means a factory-built electric spa or hot tub which may or may not include any combination of integral controls, water heating or water circulating equipment. ¶
(16) "Product" means a particular model number or series available from a particular manufacturer, as distinct from a category of equipment. ¶
(17) "Residential ventilating fan" means a ceiling, wall-mounted, or remotely mounted in-line fan designed to be used in a bathroom or utility room, whose purpose is to move air from inside the building to the outdoors.
Statutory/Other Authority: ORS 469.040, ORS 469.255, ORS 469.261
Statutes/Other Implemented: ORS 469.229-469.261, OL 2021, chapter 108 (House Bill 2062)
AMEND: 330-092-0015

NOTICE FILED DATE: 09/28/2021

RULE SUMMARY: The amendments re-order and re-number the list of products to match the new order and numbers in statute; update the corresponding statutory references; and group the list of plumbing fittings to match the language in statute as amended by Oregon Laws chapter 108 (House Bill 2062). In response to comments received at the public hearing and during the public comment period, the department made one additional change in the final rules to postpone the effective date for the new standard for electric storage water heaters from January 1, 2022 to July 1, 2022 due to pandemic-related manufacturing delays.

CHANGES TO RULE:

330-092-0015
Effective Dates for Regulated Equipment ¶¶

The following list specifies the effective dates for equipment standards, test procedures, listing, and labeling requirements which have been adopted in these rules: ¶¶

1. Televisions, as defined in ORS 469.229(43): The standards in ORS 469.233(18) ¶¶
(1) Bottle-type water dispensers, as defined in OAR 330-092-0010(1): The standards in OAR 330-092-0020(1) are effective for bottle-type water dispensers that are manufactured on or after January 1, 2022. ¶¶
(2) Commercial hot food holding cabinets, as defined in ORS 469.229(13): The standards in ORS 469.233(2) are effective September 1, 2009 for sale of equipment in Oregon and September 1, 2010 for installation. ¶¶
(3) Compact audio products, as defined in ORS 469.229(15): The standards in ORS 469.233(3) are effective September 1, 2009 for sale of equipment in Oregon and September 1, 2010 for installation. ¶¶
(4) Digital versatile disc players and digital versatile disc recorders, as defined in ORS 469.229(21): The standards in ORS 469.233(4) are effective September 1, 2009 for sale of equipment in Oregon and September 1, 2010 for installation. ¶¶
(5) Portable electric spas, as defined in OAR 330-092-0010(14): The standards in OAR 330-092-0020(5) are effective for portable electric spas that are manufactured on or after January 1, 2022. ¶¶
(6) Televisions, as defined in ORS 469.229(44): The standards in ORS 469.233(6) are effective for televisions that are manufactured on or after January 1, 2014. ¶¶
(7) Battery charger systems, as defined in ORS 469.229(76): The standards in ORS 469.233(197) are effective for:
(a) Large battery charger systems manufactured on or after January 1, 2014. Federally regulated large battery charger systems that are manufactured on or after June 13, 2018 are pre-empted from further state regulation. ¶¶
(b) Small battery charger systems for sale at retail that are not USB charger systems with a battery capacity of 20 watt-hours or more and that are manufactured on or after January 1, 2014. Federally regulated small battery charger systems that are manufactured on or after June 13, 2018 are pre-empted from further state regulation. ¶¶
(c) Small battery charger systems for sale at retail that are USB charger systems with a battery capacity of 20 watt-hours or more and that are manufactured on or after January 1, 2014. Federally regulated small battery charger systems that are manufactured on or after June 13, 2018 are pre-empted from further state regulation. ¶¶
(d) Small battery charger systems that are not sold at retail that are manufactured on or after January 1, 2017. Federally regulated small battery charger systems that are manufactured on or after June 13, 2018 are pre-empted from further state regulation. ¶¶
(e) Inductive charger systems manufactured on or after January 1, 2014, unless the inductive charger system uses less than one watt in battery maintenance mode, less than one watt in no battery mode and an average of one watt or less over the duration of the charge and battery maintenance mode test. Federally regulated inductive charger systems that are manufactured on or after June 13, 2018 are pre-empted from further state regulation. ¶¶
(f) Battery backups and uninterruptible power supplies, manufactured on or after January 1, 2014, for small battery charger systems for sale at retail, which may not consume more than 0.8 + (0.0021xEb) watts in battery maintenance mode, where (Eb) is the battery capacity in watt-hours. Federally regulated uninterruptible power supplies that are manufactured on or after June 13, 2018 are pre-empted from further state regulation. ¶¶
(g) Battery backups and uninterruptible power supplies, manufactured on or after January 1, 2017, for small battery charger systems not sold at retail, which may not consume more than 0.8 + (0.0021xEb) watts in battery maintenance mode, where (Eb) is the battery capacity in watt-hours. Federally regulated uninterruptible power supplies that are manufactured on or after June 13, 2018 are pre-empted from further state regulation. ¶¶
(h) Bottle-type water dispensers, as defined in OAR 330-092-0010(1). ¶¶
(i) High light output double-ended quartz halogen lamps, as defined in ORS 469.229(27): The standards in ORS
469.233(12)(b), are effective September January 1, 2009, for sale of equipment in Oregon and September 1, 2010, for installation. ¶

(b) High Cri fluorescent lamps: The standards in OAR 330-092-0020(32) are effective for bottle-type water dispenser high Cri fluorescent lamps that are manufactured on or after January 1, 2022. ¶

(10) Commercial hot food holding cabinets, as defined in ORS 469.229(13). The standards in ORS 469.233(13) are effective September 1, 2009 for sale of equipment in Oregon and September 1, 2010 for installation. ¶

(5) Compact audio products, as defined in OAR 469.229(16) and computers and computer monitors: The standards in OAR 469.233AR 330-092-0020(140) are effective September 1, 2009 for sale of equipment in Oregon and September 1, 2010 for installation. ¶

(6) Digital versatile disc players and digital versatile disc recorders, as defined in ORS 469.229(21): The standards in ORS 469.233(15) are effective September 1, 2009 for sale of equipment in Oregon and September 1, 2010 for installation. ¶

(7) High light output double-ended quartz halogen lamps, as defined in ORS 469.229(24): The standards in ORS 469.233(20), are effective January 1, 2016, for sale of equipment and installation. ¶

(8) Portable electric spas, as defined in OAR 330-092-0010(15): ¶

(a) The standards in ORS 469.233(16) are effective September 1, 2009 for sale of equipment in Oregon and September 1, 2010 for installation. ¶

(b) Computers and computer monitors that are manufactured on or after January 1, 2022. ¶

(11) Plumbing fittings: ¶

(a) Lavatory faucets and lavatory replacement aerators: The standards in OAR 330-092-0020(811) are effective for portable electric spas that are manufactured on or after January 1, 2022. ¶

(b) High Cri fluorescent lamps: The standards in OAR 330-092-0020(9) are effective for high Cri fluorescent lamp lavatory faucets and lavatory replacement aerators that are manufactured on or after January 1, 2023. ¶

(10) Computers and computer monitors: ¶

(b) Kitchen faucets and kitchen replacement aerators: The standards in OAR 330-092-0020(161) are effective for computers and computer monitors kitchen faucets and kitchen replacement aerators that are manufactured on or after January 1, 2022. ¶

(11) ¶

(c) Public lavatory faucets: The standards in OAR 330-092-0020(11) are effective for public lavatory faucets that are manufactured on or after January 1, 2022. ¶

(42) and ¶

(d) Showerheads: The standards in OAR 330-092-0020(121) are effective for showerheads that are manufactured on or after January 1, 2022. ¶

(12) Commercial fryers: The standards in OAR 330-092-0020(132) are effective for commercial fryers that are manufactured on or after January 1, 2022. ¶

(143) Commercial dishwashers: The standards in OAR 330-092-0020(143) are effective for commercial dishwashers that are manufactured on or after January 1, 2022. ¶

(144) Commercial steam cookers: The standards in OAR 330-092-0020(154) rules are effective for commercial steam cookers that are manufactured on or after January 1, 2022. ¶

(165) Residential ventilating fans: The standards in OAR 330-092-0020(165) are effective for residential ventilating fans that are manufactured on or after January 1, 2022. ¶

(176) Electric storage water heaters: The standards in OAR 330-092-0020(176) are effective for electric storage water heaters that are manufactured on or after January 1, 2022. ¶

(18) The following equipment is currently federally regulated and not subject to further regulation under ORS 469.229 through 469.261 or these rules: ¶

(a) Automatic commercial ice cube machines, as defined in ORS 469.229(2). ¶

(b) Battery charger systems and uninterruptible power supply chargers as defined in ORS 469.229 that meet the scope of federal regulation. ¶

(c) Commercial clothes washers, as defined in ORS 469.229(12). ¶

(d) Commercial pre-rinse spray valves, as defined in ORS 469.229(14). ¶

(e) Commercial refrigerators and freezers, as defined in ORS 469.229(15). ¶

(f) Illuminated exit signs, as defined in ORS 469.229(25). ¶

(g) Metal halide lamp fixtures, as defined by ORS 469.229(29). ¶

(h) Single voltage external AC to DC power supplies, as defined in ORS 469.229(40). ¶

(i) Incandescent reflector lamps, as defined in ORS 469.229(42). ¶

(j) Torcheres, as defined in ORS 469.229(46). ¶

(k) Traffic signal modules, as defined in ORS 469.229(47). ¶

(l) Unit heaters, as defined in ORS 469.229(48). ¶

(m) Walk in refrigerators and walk in freezers, as defined in ORS 469.229(50) July 1, 2022.
Statutory/Other Authority: ORS 469.040, ORS 469.255, ORS 469.261
Statutes/Other Implemented: ORS 469.229-469.261, OL 2021, chapter 108 (House Bill 2062)
AMEND: 330-092-0020

NOTICE FILED DATE: 09/28/2021

RULE SUMMARY: The amendments re-order and re-numbered the list of products to match the new order and numbers in statute; update corresponding references; and group plumbing fittings together to reflect the language in statute as amended by Oregon Laws chapter 108 (House Bill 2062).

Secondly, the amendments update the standard for computers and computer monitors to match an amendment to the standard which was adopted by California December 9, 2020, and will become effective December 9, 2021. The original reference date to California was “as adopted on May 10, 2017, and amended on November 8, 2017.”

Thirdly, the amendments encourage rather than require manufacturers to also make a similar request to other states when they make a request for an alternative communications port and communication interface standard in Oregon for electric storage water heaters.

CHANGES TO RULE:

330-092-0020
Minimum Energy Efficiency Standards and Test Methods

(1) Televisions: Beginning on the effective date shown in OAR 330-092-0015(4) Bottle-type water dispensers: Beginning on the effective date shown in OAR 330-092-0015(1), bottle-type water dispensers, or water coolers, included in the scope of the Environmental Protection Agency ENERGY STAR® program product specification for water coolers, version 2.0, must have an "on mode with no water draw" energy consumption less than or equal to the following values as measured in accordance with the test requirements of that program:
(a) 0.16 kilowatt-hours per day for cold-only units and cook and cold units;
(b) 0.87 kilowatt-hours per day for storage type hot and cold units; and
(c) 0.18 kilowatt-hours per day for on demand hot and cold units.

(2) Commercial hot food holding cabinets: Beginning on the effective date shown in OAR 330-092-0015(2), commercial hot food holding cabinets shall meet the requirements of ORS 469.233(2).

(3) Compact audio products: Beginning on the effective date shown in OAR 330-092-0015(3), compact audio products shall meet the requirements of ORS 469.233(3).

(4) Digital versatile disc players and digital versatile disc recorders: Beginning on the effective date shown in OAR 330-092-0015(4), digital versatile disc players and digital versatile disc recorders shall meet the requirements of ORS 469.233(4).

(5) Portable electric spas: Beginning on the effective date shown in OAR 330-092-0015(5), portable electric spas must meet the requirements of the American National Standard for portable electric spa energy efficiency (ANSI/APSP/ICC-14 2019) and must be tested in accordance with the method specified in the American National Standard for portable electric spa energy efficiency (ANSI/APSP/ICC-14 2019).

(6) Televisions: Beginning on the effective date shown in OAR 330-092-0015(6), televisions must meet the energy efficiency standards in ORS 469.233(186) as measured in accordance with the federal test procedure described in 10 CFR Section 430.23(h) (Appendix H to Subpart B of Part 430) (2013). Alternatively, until April 23, 2014, television efficiency may be measured in accordance with:
(a) For standby passive mode, the test methods contained in International Electrotechnical Commission (IEC) 62301:2005, Edition 1.0 “Household Electrical Appliances - Measurement of Standby Power”; and
(b) For on mode and power factor test, the test methods contained in IEC 62087:20008(E), Edition 2.0 - “Methods of Measurement for the Power Consumption of Audio, Video and Related Equipment”, Section 11.6.1 - “On mode (average testing with dynamic broadcast-content video signal)” and the specifications contained in the California Code of Regulations, Title 20, Division 2, Chapter 4, Article 4, Section 1604(v)(3), effective January 1, 2011.

Battery charger systems: Beginning on the effective date shown in OAR 330-092-0015(27), battery charger systems must meet the energy efficiency standards in ORS 469.233(1927) as measured in accordance with:
(a) For small battery charger systems that are not: federally regulated battery chargers, uninterruptible power supplies, or battery backups, the test methods contained in 10 CFR Section 430.23(aa) (Appendix Y to Subpart B of Part 430) (Jan. 1, 2017).
(A) Multi-port battery charger systems shall be tested for 24-hour efficiency and maintenance mode with a battery in each port.
(B) For single port small battery charger systems, the highest 24-hour charge and maintenance energy, maintenance mode, and no battery mode results of the test procedure shall be used for purposes of reporting and determining compliance with ORE 469.233(497)(b). ¶

(C) For purposes of computing the small battery charger system standard, the number of ports included in a multi-port charger system shall be equal to the number ports that are separately controlled. For example, a multi-port charger system that charges eight batteries by using two charge controllers that charge four batteries in parallel would use two for "N" as described in ORE 469.233(497)(b). ¶

(D) Small battery charger systems that are not sold at retail may use the battery manufacturer's recommended end of discharge voltage in place of values in 10 CFR section 420.23(aa) (Appendix Y to subpart B of part 430) (Jan.1, 2017), Table 3.3.2, where the table's values are not applicable. ¶

(b) For battery backups and non-federally regulated uninterruptible power supplies, the test methods contained in 10 CFR Section 430.23(aa) (Appendix Y to Subpart B of Part 430) (Jan. 1, 2016). ¶

(c) For large battery charger systems that are not federally regulated battery chargers or federally regulated uninterruptible power supplies, the test methods contained in Energy Efficiency Battery Charger System Test Procedure Version 2.2 dated November 12, 2008, and published by ECOS and EPRI Solutions, with the following modifications. ¶

(A) The test procedure shall be conducted for 100, 80, and 40 percent discharge rates for only one charge profile, battery capacity, and battery voltage. The manufacturer shall test one battery and one charge profile using the following criteria: ¶

(i) the charge profile with the largest charge return factor; ¶

(ii) the smallest rated battery capacity; and ¶

(iii) the lowest voltage battery available at that rated capacity. ¶

(B) The battery manufacturer's recommended end of discharge voltage may be used in place of values in the test method part 1, section III.F, Table D where the table's values are not applicable. ¶

(2) Bottle-type water dispensers: Beginning on the effective date shown in OAR 330-092-0015(3), bottle-type water dispensers, or water coolers, included in the scope of the Environmental Protection Agency ENERGY STAR® program product specification for water coolers, version 2.0, must have an "on mode with no water draw" energy consumption less than or equal to the following values as measured in accordance with the test requirements of that program: ¶

(a) 0.16 kilowatt-hours per day for cold-only units and cook and cold units; ¶

(b) 0.87 kilowatt-hours per day for storage type hot and cold units; and ¶

(c) 0.18 kilowatt-hours per day for on demand hot and cold units. ¶

(4) Commercial hot food holding cabinets: Beginning on the effective date shown in OAR 330-092-0015(4), commercial hot food holding cabinets shall meet the requirements of ORE 469.233(13). ¶

(5) Compact audio products: Beginning on the effective date shown in OAR 330-092-0015(5), compact audio products shall meet the requirements of ORE 469.233(14). ¶

(6) Digital versatile disc players and digital versatile disc recorders: Beginning on the effective date shown in OAR 330-092-0015(6), digital versatile disc players and digital versatile disc recorders shall meet the requirements of ORE 469.233(15). ¶

(7) High light output double-ended quartz halogen lamps: Beginning on the effective date shown in OAR 330-092-0015(7), high light output double-ended quartz halogen lamps must meet the energy efficiency standards in ORE 469.233(208), as measured in accordance with the IESNA LM-45: Approved Method for Electrical and Photometric Measurements of General Service Incandescent Filament Lamps published by the Illuminating Engineering Society of North America. ¶

(8) Portable electric spas: Beginning on the effective date shown in OAR 330-092-0015(8), portable electric spas must meet the requirements of the American National Standard for portable electric spa energy efficiency (ANSI/ASPi/ICC-14-2019) and must be tested in accordance with the method specified in the American National Standard for portable electric spa energy efficiency (ANSI/ASPi/ICC-14-2019). ¶

(9) High CRI fluorescent lamps: Beginning on the effective date shown in OAR 330-092-0015(9), high CRI fluorescent lamps shall meet the minimum efficacy requirements contained in Section 430.32(n)(4) of Title 10 of the Code of Federal Regulations as in effect on January 1, 2020, as measured in accordance with Appendix R to Subpart B of Part 430 of Title 10 of the Code of Federal Regulations-"Uniform Test Method for Measuring Average Lamp Efficacy (LE), Color Rendering Index (CRI), and Correlated Color Temperature (CCT) of Electric Lamps" as in effect on January 1, 2020. ¶

(10) Computers and computer monitors: Beginning on the effective date shown in OAR 330-092-0015(10), computers and computer monitors must meet the requirements in the California Code of Regulations, Title 20, section 1605.3(v) as adopted on May 10, 2017, and amended on Nov in effect as of December 89, 2021, as measured in accordance with test methods prescribed in section 1604(v) of those regulations. ¶

(11) Fauceet Plumbing Fittings: Beginning on the effective date shown in OAR 330-092-0015(11), the following
plumbing fittings must meet the requirements in the California Code of Regulations, Title 20, section 1605.3 as in effect on January 1, 2020, as measured in accordance with the test methods prescribed in the California Code of Regulations, Title 20, section 1604 as in effect on January 1, 2020.

(a) Lavatory faucets and lavatory replacement aerators
(b) Kitchen faucets and kitchen replacement aerators
(c) Public lavatory faucets

(12) Showerheads: Beginning on the effective date shown in OAR 330-092-0015(12), showerheads must meet the requirements in the California Code of Regulations, Title 20, section 1605.3 as in effect on January 1, 2020, as measured in accordance with the test methods prescribed in the California Code of Regulations, Title 20, section 1604 as in effect on January 1, 2020.

(d) Showerheads

(132) Commercial fryers: Beginning on the effective date shown in OAR 330-092-0015(132), commercial fryers included in the scope of the Environmental Protection Agency ENERGY STAR® program product specification for commercial fryers, version 2.0, must meet the qualification criteria, requirements, and testing requirements for that specification.

(143) Commercial dishwashers: Beginning on the effective date shown in OAR 330-092-0015(143), commercial dishwashers included in the scope of the Environmental Protection Agency ENERGY STAR® program product specification for commercial dishwashers, version 2.0, must meet the qualification criteria, requirements, and testing requirements of that specification.

(154) Commercial steam cookers: Beginning on the effective date shown in OAR 330-092-0015(154), commercial steam cookers included in the scope of the Environmental Protection Agency ENERGY STAR® program product specification for commercial steam cookers must meet the qualification criteria, requirements, and testing requirements of the ENERGY STAR® Program Product Specification for Commercial Steam Cookers, version 1.2.

(165) Residential ventilating fans: Beginning on the effective date shown in OAR 330-092-0015(165), residential ventilating fans included in the scope of the Environmental Protection Agency ENERGY STAR® program product specification for residential ventilating fans shall meet the qualification criteria of the ENERGY STAR® Program Requirements Product Specification for Residential Ventilating Fans, version 3.2.

(176) Electric storage water heaters:

(a) Beginning on the effective date shown in OAR 330-092-0015(176), electric storage water heaters must have a modular demand response communications port compliant with:

(A) The March 2018 version of the ANSI/CTA-2045-A communication interface standard, or a standard determined by the department to be equivalent; and

(B) The March 2018 version of the ANSI/CTA-2045-A application layer requirements.

(b) Upon written request and submittal of information by a manufacturer, the department will determine whether an alternative communications port and communication interface standard are equivalent for the purposes of subsection (a) of this section. Any such request to the department must also be made. The department encourages manufacturers to also make such a request to other states that have a similar standard, and the department may coordinate review of the submittal with other states, and when making its determination may consider if similar requests have been made to other states and any responses from those states in order to encourage consistency between Oregon standards and standards in other states.

(A) Any requested alternative must use a standard that is open and widely available and must provide the demand response functions provided using the standards identified in subsection (a) of this section.

(B) A request for designation of a standard must provide technical documentation demonstrating that the standard satisfies the requirements in (A) of this subsection and must describe any industry or stakeholder process used in developing the standard. The department will provide reasonable opportunity for input by utilities, manufacturers, technical experts and other interested stakeholders prior to determining whether the proposed standard is equivalent. The department will make available on a publicly accessible website any standard that it determines to be equivalent.

Statutory/Other Authority: ORS 469.040, ORS 469.255, ORS 469.261
Statutes/Other Implemented: ORS 469.229-469.261, OL 2021, chapter 108 (House Bill 2062)
AMEND: 330-092-0025

NOTICE FILED DATE: 09/28/2021

RULE SUMMARY: The amendments re-order and re-number the list of products to match the new order and numbers in statute, and group plumbing fittings to reflect the grouping of products in statute as amended by Oregon Laws 2021 chapter 108 (House Bill 2062).

Electric storage water heaters: Every unit of every electric storage water heater must have a label or marking indicating compliance with the standard in this section. Each electric storage water heater subject to these rules must have the following label or marking on the product: "DR-ready: CTA-2045-A." If the product complies with an additional communication interface standard, the label or marking may include the additional standard ("DR-ready: CTA-2045-A and [equivalent DR system protocol]"). The label or marking must be legible and located so as to be readily apparent after a typical installation.¶

The Department may waive marking, labeling or tagging requirements for products marked, labeled or tagged in compliance with federal requirements.¶

No waiver will be made for an individual manufacturer or individual product. However, the Department may grant a waiver from these labeling requirements on a case-by-case basis for a category of equipment if it determines the following:¶

(a) Oregon's labeling requirements would be different and more burdensome than requirements in other states with similar standards;¶

(b) Current labeling materially complies with the intent of Oregon's labeling requirements; or¶

(c) Labeling is unnecessary.
