# Oregon Renewable Energy Siting Assessment ORESA Mapping and Reporting Tool

Primary users of the tool include renewable energy developers, land use authorities, planners and policy makers at all levels (local, state, tribal and federal)

#### **ORESA Tool Objectives**

- Facilitate easy access to data and information to support new renewable energy developments in Oregon with consideration given to military training and operational area compatibilities, economic and community benefits, current land use policies and plans, cultural and environmental resource assets, and state and local regulatory requirements.
- Promote and establish a framework for early notification and ongoing coordination and communications on potential development projects with the Military and other agencies.
- Make accessible a transparent, consistent collection of trusted, accurate data and information, without recommendations or endorsements, and note where information may be imprecise or uncertain.

#### **Potential Use Cases**

A developer is looking for possible sites for renewable energy development in Oregon that will be economically viable and have a high likelihood of success for approval. The ability to quickly assess many data layers and receive a simple summary of the anticipated environmental, cultural and military considerations at the specified site(s) will assist their planning activities. If a developer decides to proceed with a specific site, the Tool will enable notification and coordination with the appropriate Military contacts, as well as contact information for other interested parties.

A county planning department receives an application for a large utility scale renewable energy facility filed under the provisions of ORS 215.446 (HB 2329). Access to the Tool assists the planners to lets them know with whom to communicate and coordinate and prepare a thorough staff report that better answer questions that might come from the planning commission or elected officials during the public hearing process.

#### **Project Contacts and Information**

ORESA Project Coordinator: Kaci Radcliffe, ODOE (<a href="kaci.radcliffe@oregon.gov">kaci.radcliffe@oregon.gov</a>)
Oregon Explorer Contacts: Janine Salwasser, INR (<a href="janine.salwasser@oregonstate.edu">janine.salwasser@oregonstate.edu</a>)
or Myrica McCune, INR (<a href="mailto:myrica.mccune@oregonstate.edu">myrica.mccune@oregonstate.edu</a>)

Revised: April 13,2021

The tool will be housed on the <u>Oregon Explorer</u>, and maintained by the Institute for Natural Resources (INR) and the Oregon State University Libraries & Press

### **ORESA Mapping & Reporting Tool Functionality**

Users will be involved in the development of the ORESA tool. Anticipated functionality includes, but is not limited to:

- Ability to filter and query data layers, measure areas and distances, view metadata, download data, add external map services, upload local data, and create maps
- Identification of restricted areas as well as sites with additional considerations and trade-offs
- Inclusion of military contact information for notification and coordination in applicable locations
- Creation of a Renewable Energy Site Report for an area of interest with additional context and maps in pdf format

#### **Tool Timeline**

## Fall 2019 Project Begins

Scoping, Cross
Assessment
Coordination,
Stakeholder
Engagement &
Data Gathering

Spring 2021
Data Collection
Complete

Tool Development & User Group Meetings

Summer 2021 Beta Tool Ready for Testing

Beta Testing with Users & Tool Improvements

Winter 2021
Tool Launch on the
Oregon Explorer
